Copyright © 2011 JV-Auriga. All Rights Reserved. Designed by Joomlavi.com

JV Auriga is Joomla! Template developed by Joomlavi group.

This template, like all templates developed by Joomlavi group, consists of two parts: The theme manager component JV Framework and the theme named JV Auriga.

This template was designed for business and marketing sites, but it's not over-focused and can be used for several other purposes.

# DEMO & DOWNLOADING

To download JV Auriga Template, register a username on <http://Joomlavi.com> and purchase a package .

Afterward, you can look for JV Auriga within the “Joomla! Templates” page (which can be accessed by hovering your mouse over “Joomla! Products” menu and select “Joomla! Templates”).

You can also go to JV Auriga’s page directly using this URL: <http://www.joomlavi.com/joomla-templates/10-joomla-templates/jv-auriga.html>

## JV Auriga

Friday, 05 August 2011 10:36

JV Auriga is a business template with simple layout, yet still managed to look modern, likable and friendly thanks to its bright, vibrant colors and neat frames.

JV Auriga comes with 4 different colors: cyan, pink, blue and purple. It also brought along several tools to make modifying the layout an easy affair.

Don't underestimate this template, since the simple and friendly feel will attract a lot of customers for certain services.

### Features

- Support RTL
- Quickstart (Joomla install that includes demo data)
- Mobiles: iPhone/iPad, Android, handheld theme
- Drop and drag module position.
- Validate XHTML and CSS
- 100% tableless CSS
- CSS3 powered
- Multiple Layout Options
- Google Fonts
- SEO Optimized
- 4 Colors
- Flexible template and column widths
- Custom theme profile
- Compatible: Firefox, IE 7+, Chrome, Safari, Opera ...
- Columns: Unlimited
- Typography
- Add new position, block (unlimited number of positions and blocks), edit and delete position and block...

Tags : [Joomla Templates](#) [Joomla 1.5](#) [Joomla 1.6](#) [Joomla 1.7](#)

Within JV Auriga’s page, there are two sets of buttons under the theme’s main image, one for Joomla! 1.5 and one for Joomla! 1.7. Each set consists of 3 buttons: ‘Live Demo’, ‘Download’ and ‘Position’

Clicking on 'Position' will show you the positions of this template.

Clicking on 'Live Demo' would redirect you to a demo-site using JV Auriga. This is also what your site will look like when using a Quick-start version of this template.

Clicking on 'Download' will open the download page of Joomla! 1.5 version or Joomla! 1.7 version.

The screenshot shows the JV Auriga download page. At the top, there are social media links for Twitter, Facebook, and RSS. Below that, there are category and developer information. The main section is titled 'JV Auriga files:' and contains a table with columns for File name, Type, Date, and Version. A blue callout box points to the checkboxes in the first column, stating: 'Check the box(es) in front of the file(s) you want to download to select it/them'. A red callout box points to the 'Download' button, stating: 'Click to download selected file(s)'. The table lists five files: Mod JV News 17 (module, 06-05-2011, 1.6.1.6), Mod JV Slideshow 17 (module, 14-04-2011, 1.7.0.0), Theme JV Auriga 17 (template, 11-08-2011, 1.7.0.0), Quickstart JV Auriga 17 (quickstart, 11-08-2011, 1.7.0.0), and Source JV Auriga (special, 05-08-2011, 1.0.0.0). To the right of the table, there is a 'Download' button and a counter showing '0 selected files'. The right sidebar contains 'Follow us on' links for Facebook, Twitter, RSS, and Joomla! Extension Directory, and a 'Latest Extensions' section with thumbnails for JV Bing Translator, JV Pet, JV Events, and JV Photos.

| <input type="checkbox"/> | File name               | Type       | Date       | Version |
|--------------------------|-------------------------|------------|------------|---------|
| <input type="checkbox"/> | Mod JV News 17          | module     | 06-05-2011 | 1.6.1.6 |
| <input type="checkbox"/> | Mod JV Slideshow 17     | module     | 14-04-2011 | 1.7.0.0 |
| <input type="checkbox"/> | Theme JV Auriga 17      | template   | 11-08-2011 | 1.7.0.0 |
| <input type="checkbox"/> | Quickstart JV Auriga 17 | quickstart | 11-08-2011 | 1.7.0.0 |
| <input type="checkbox"/> | Source JV Auriga        | special    | 05-08-2011 | 1.0.0.0 |

There will be multiple files in the download page. Before selecting which file(s) to download, please consider what you are planning to do.

*-If you are setting up a new site, the Quick-Start version is the best choice, because it will install an entire new site with all associated extensions and styled to look like the template's live demo.*

*-If you already have a site and don't want to replace it, or you only want the template without extensions and styling, the Theme version will be your choice. Installing a theme will give you only a new template/theme without any extra extension or data loss.*

After you have confirm the file(s) you need, select them by ticking the box(es) in front of said file(s), then click download.

If the file you downloaded has 'unzip\_first' in its name, please extract it before continuing with the installation.

# INSTALLATION

## Installing JV Auriga template with Quick star version:

To install a QuickStart version of JV Auriga, follow the following steps:

- Extract the file with 'unzip\_first' in its name.
- Extract the resulting file into a folder. For example, let name the folder 'Auriga'.
- Copy or upload (via FTP) said folder to your server's.
- Open your browser and open the URL to the folder you copied. For example, on a local host, the URL would be: http://localhost/Auriga/
- Install the quickstart template the same way you install a new Joomla! instance using browser. During the installation process, you must remember to install Sample Data by clicking on the Install Sample Data button.

**Site Name:**  
Enter the name of your Joomla! site.

Site Name

**Confirm the Admin E-mail and Password.**  
Enter your e-mail address. This will be the e-mail address of the Web site Super Administrator.  
Enter a new password and then confirm it in the appropriate fields. Along with the username **admin**, this will be the password that you will use to login to the Administrator Control Panel at the end of the installation.  
If you are migrating, you can ignore this section. Your current settings will be automatically migrated.

Your E-mail   
Admin Password   
Confirm Admin Password

**Load Sample Data, Restore or Migrate Backed Up Content**

**Important:** It is strongly recommended that new Joomla! users install sample data. To do this, select the option *and* click on the button *before* leaving the installation.

Before leaving the installation, you can populate the site databases three ways to do this:

**1. Default sample data** can be inserted. To do this, select the **Install Sample Data** button.

**2a. A Joomla! 1.5.x compatible SQL script file** can be uploaded from a localhost and executed on the site. This could be for installing localised sample data or restoring a Joomla! 1.5.x backup. The script should have the correct table prefixes, be in UTF-8 encoding and comply with the Joomla! 1.5.x database schema.

**2b. Migrate content from previous versions of Joomla!.** Selecting the Load Migration Script option enables support for the migration of older Joomla! 1.0.x version database dumps to a new Joomla! 1.5.x site. The required conversions are performed on-the-fly and the migration script file can be created on the older site by using the `com_migrate` component. For further information about the component and the migration procedure, please see the [Joomla! 1.5 Migration Guide](#).

You can upload uncompressed SQL script files, zip-packed script files and gz-packed script files. Packed files may contain only one SQL script file. If your file is too big to handle or causing memory and time limit errors, upload the uncompressed file into the `/installation/sql/migration/` folder. Rename it `migrate.sql` and then tick the 'I have already

**Please remember to install Sample Data**

Install Default Sample Data *Installing sample data is strongly recommended for beginners. This content that is included in the Joomla! installation package.*

**Install Sample Data**

Load Migration Script *The migration script needs to be created on the old site by the `com_migrate` component. Enter the table prefix of the old site and enter the encoding (ISO setting in language file or as seen in browser info/encoding/sc) Joomla! 1.5 migration SQL scripts need to be Joomla 1.5.x compatible and use the appropriate table prefix.*

Maximum Upload Size: Your server's maximum file upload size is 2.00MB..

Old Table Prefix

Old Site Encoding

Migration Script

I have already uploaded the migration script to the server (e.g. `com_migrate.sql`)

This script is a Joomla! 1.0 migration script.

## Installing JV Auriga template with Theme version:

You will need to install a theme managing component called JV Framework before you can install JV Auriga as a theme.

## To install JV Framework:

- Click on JV Frame Work download on the upper right corner, just under user menu.

The screenshot shows the JV Framework website with a navigation bar containing links for JOOMLA! TEMPLATES, PORTFOLIOS, TUTORIALS, CUSTOM SERVICES, REQUEST A QUOTE, and JOOMLA! PRODUCTS. Below the navigation is a search bar and a 'Joomla!® templates club' header. The main content area features a grid of Joomla! templates: JV Events, JV Hitech, JV Desire, and JV Pet. On the right side, there is a 'JV Framework' logo and a section for Joomla! 1.5.x and Joomla! 1.7.x, each with 'Download', 'Demo', and 'Document' buttons. A blue callout box with an arrow points to the 'Download' button for Joomla! 1.5.x, containing the text 'Click here to enter JV Framework's download page'. Below this is a 'VIDEO TOUR' and 'FAQs' section, and a 'User Menu' section.

- In the new page, select the version(s) you need and click download. There are different versions for Joomla! 1.5 and Joomla 1.7.

*Please note that from JV Framework version 4.5 and newer, the 'install file' can be used for all version of Joomla!.*

- If the file you downloaded has 'unzip\_first' in its name, remember the extract the file before continue installing. The resulting file(s) from extracting an 'unzip\_first' file will be called 'install file(s)' henceforth,
- Log into your joomla! back end, select extension manager (Joomla! 1.7) or Install/Uninstall (Joomla! 1.5) from extension manager menu.

The screenshot shows the Joomla! Administration interface. The top navigation bar includes 'Administration' and a menu with 'Site', 'Users', 'Menus', 'Content', 'Components', 'Extensions', and 'Help'. The user is logged out ('None Logged'). The main content area is titled 'Extension Manager: Install' and has a sub-menu with 'Install', 'Update', 'Manage', 'Discover', and 'Warnings'. A red callout box with an arrow points to the 'Browse...' button, containing the text 'Or click on Browse to find it manually'. Below this is the 'Upload Package File' section, which has a 'Package File' input field and an 'Upload & Install' button. A blue callout box with an arrow points to the 'Package File' input field, containing the text 'Enter the path to your file here'. Below this is the 'Install from Dir' section, which has an 'Install Directory' input field with the value 'D:\wamp\www\joomla16\tmp' and an 'Install' button.

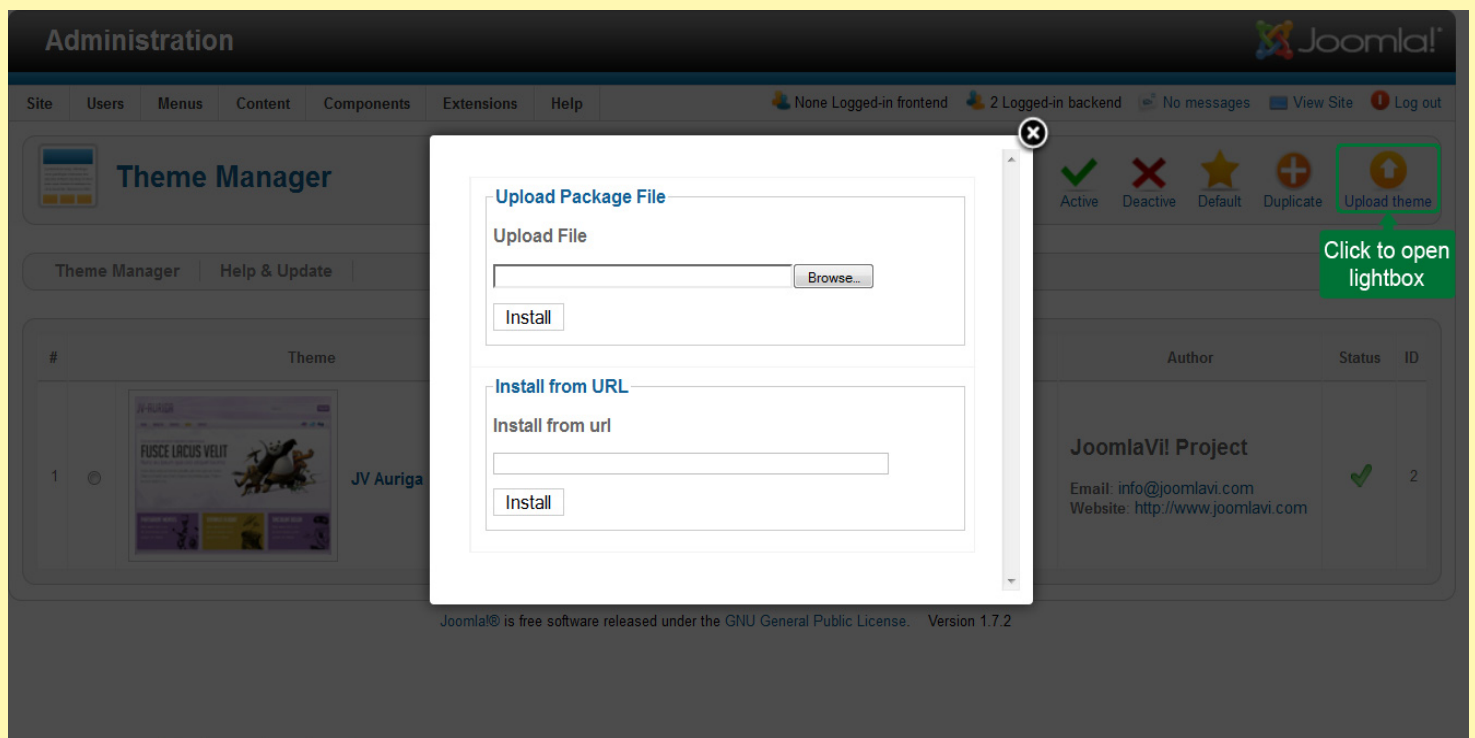

- On install tab, type the path to your file into the blank field of 'install from package' section or click on 'browse' to find it manually
- Click on 'Upload & Install'.
- Now you can find 'JV Framework" from the component menu.

## Installing JV Auriga theme

### Using upload theme:

#### **\*Version 4.4 (1.5.4.4 or 1.7.4.4) or older:**

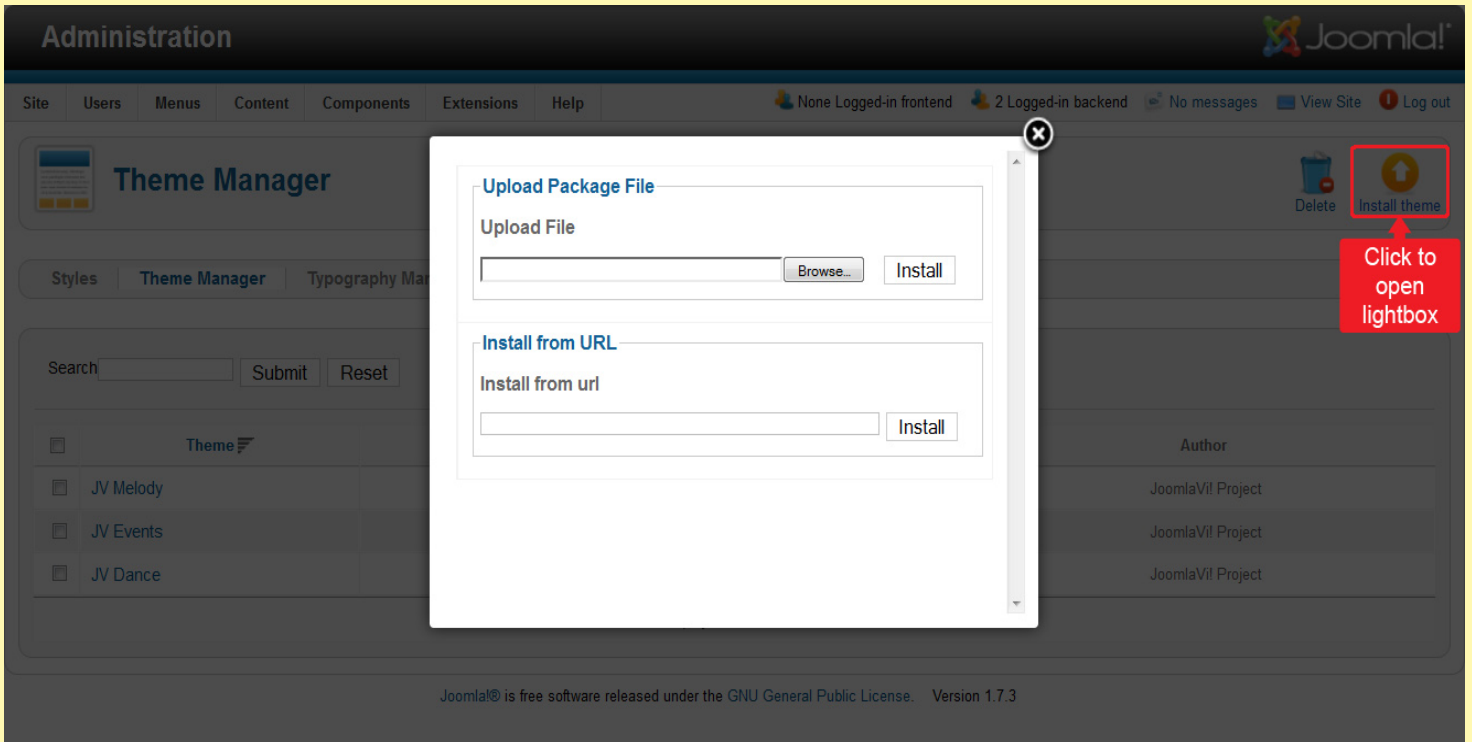

- Rename your install file and remove the number at the end, leaving only the theme's name.
- From back end, access JV Framework from component menu.
- Inside JV Framework theme manager page, click on the upload theme button.

- type the path to your file into the blank field or click on browse to find the theme manually.
- Click on install to finish uploading the new theme.

**\*Version 4.5 or newer:**

- From back end, access JV Framework from component menu.
- Click on tab 'Theme manager' tab.
- Inside JV Framework Theme manager page, click on the 'Install theme' button.

- Type the path to your file into the blank field or click on browse to find the theme manually.
- Click on install to finish uploading the new theme.

**Installing manually:**

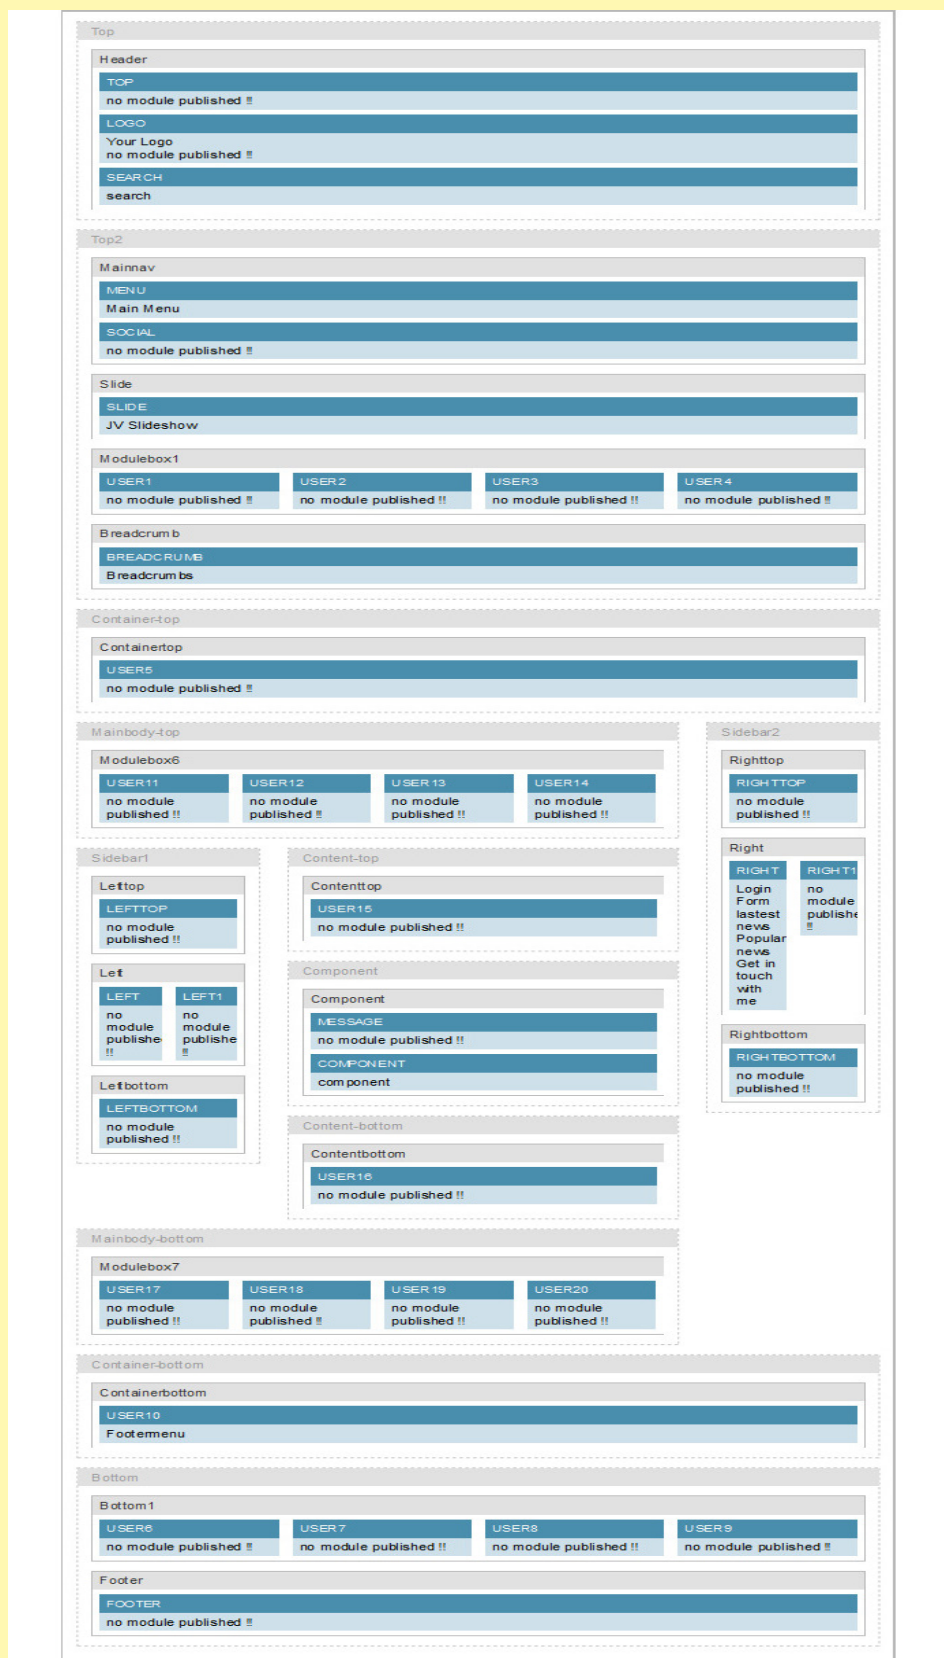

- Extract the theme's 'install file'.
- Copy the resulting folder to <templates\jv-framework\themes> within your site's source folder.
- return to JV Framework's theme manager in your site's back end and check your theme list.

# MANAGING JV AURIGA WITH JV FRAMEWORK

For the basic functions of JV Framework, please refer to JV Framework User guides

The main difference between themes when using JV Framework is the position layout. The following image will show the default layout of JV Auriga:

## EXTENSIONS OF JV AURIGA:

If you used the Quick-start version of JV Auriga template, the following extensions will be included, styling included. For a JV Auriga theme user, you would have to download and install these extensions manually:

### JV Slideshow (Module)

\*To replicate the Demo site, this module should be assigned to the position 'Slide' on all pages.

-Prepare a folder where you store the images you wanted to use. If you wanted to display thumbnails for your slides, create a "thumbnails" folder within the image folder and store the resized images you want to use as thumbnails there .

-Within your site back end, go to Module Manager and click on the module's name.

-Inside Module mod, set the location to your image folders, select your source and set the parameters.

-Set the module to published/enable and select the pages where you want to display it.

-Save the setting and click on Preview (Joomla! 1.5) or View Site (Joomla! 1.7).

The screenshot displays the JV-Auriga Joomla! template homepage. At the top, the 'JV-AURIGA' logo is on the left, and a search bar is on the right. A green box labeled 'JV Slideshow' has an arrow pointing to a large banner area. The banner features a 3D cartoon illustration of Kung Fu Panda characters (Po, Shifu, Tigress, Mantis, and Crane) and contains the following text: 'DUIS EU MAURIS SED DIAM DIGNISSIM PELLENTESQUE', 'FUSCE LACUS VELIT', 'NUNC EU IPSUM QUIS ORCI ALIQUET LACINIA', and a paragraph of Lorem Ipsum. Below the banner is a 'HOME' breadcrumb. The main content area is divided into three columns: 'SERVICES' with four items, 'ABOUT US' with an image of money and a globe and a paragraph of Lorem Ipsum, and 'LOGIN FORM' with fields for 'User Name' and password, a 'Remember Me' checkbox, and a 'LOG IN' button. At the bottom of the login form are links for 'Forgot your password?' and 'Forgot your username?'.

For the parameters' effects, please read JV Slideshow User Guide

## JV News

*\*To replicate the Demo site, make a module named 'Popular news' base on this module, then assign them to the pages: News (from Main menu as well as Footer menu) and Popular News.*

The parameter of this module in a quick-start version would look like the following image:

**Module Parameters**
