Joomla! 15 :	Live Demo	Download	Position
Joomla! 17 :	Live Demo	Download	Position

Within JV Dance's page, below the screenshot, there are 2 rows of buttons for Joomla! 1.5 and Joomla! 1.7, each consists of: 'Live Demo', 'Download' and 'Position'

Clicking on 'Position' Button will show you the positions of this template.

Clicking on 'Live Demo' would redirect you to a demo-site using JV Dance. This is also what your site will look like when using a Quick-start version of this template.

Clicking on 'Download' will open the download page

The screenshot shows the 'JV Dance' Joomla! template download page. At the top, there are social media links and a 'Tweet' button. Below that, there are 'Like' and 'Send' buttons. The page includes metadata such as 'Parent Category: JV Dance', 'Category: Joomla! 17', 'Developer: www.joomlavi.com', 'Website: www.joomlavi.com', 'Demo: http://demo.joomlavi.com/#j17/jv-dance', 'Document:', 'Support: http://www.joomlavi.com/index.php?Itemid=378', 'License: Commercial', and 'Tags: JV Dance, joomla template, dance crew'. On the right, there is a banner for 'ACCEPT CUSTOM WORK' and a 'Follow us on' section with links to Facebook, Twitter, RSS, and Joomla! Extension Directory.

Annotations on the screenshot:

- A blue box with a white arrow pointing to the 'Download' button: "To select a file for download, check the respective box in this volume. Multiple files can be selected".
- A red box with a white arrow pointing to the 'Download' button: "When you have finished selecting the file(s), click on this button to start download".

There will be multiple files in the download page. Before selecting which file(s) to download, please consider what you are planning to do.

-If you are setting up a new site, the Quick-Start version is the best choice, because it will install an entire new site with all associated extensions and styled to look like the template's live demo.

-If you already have a site and don't want to replace it, or you only want the template without extensions and styling, the Theme version will be your choice. Installing a theme will give you only a new template/theme without any extra extension or data loss.

After you have confirm the file(s) you need, select them by ticking the box(es) in front of said file(s), then click download.

If the file you downloaded has 'unzip_first' in its name, please extract it before continuing with the installation.

INSTALLATION

Installing JV Dance template with Quick star version:

To install a QuickStart version of JV Dance, follow the following steps:

-Extract the file with 'unzip_first' in its name.

-Extract the resulting file into a folder

-Copy or move said folder into your server's source folder.

-Install the quickstart template the same way you install a new Joomla! instance using browser. During the installation process, you must remember to install Sample Data by clicking on the Install Sample Data button.

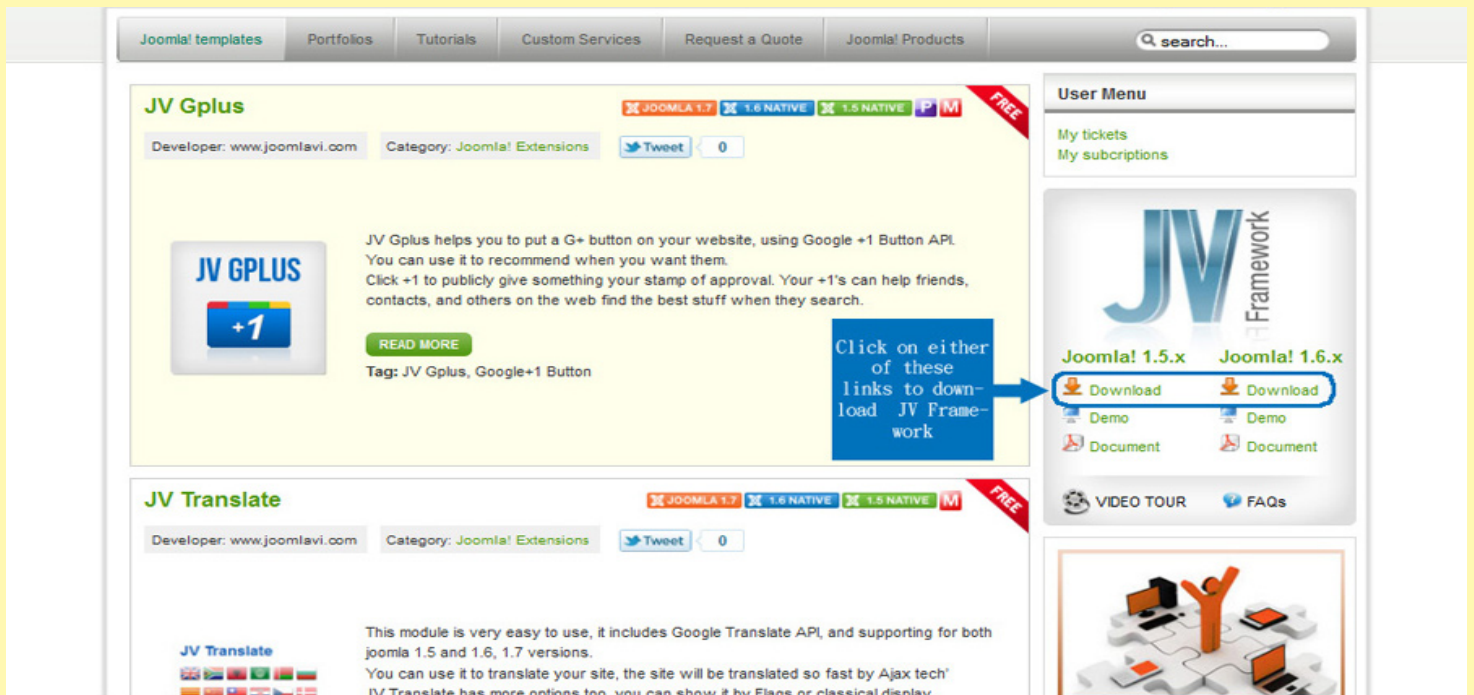

The screenshot shows the Joomla! installation interface. At the top, there is a section for 'Site Name' with a text input field. Below that is the 'Confirm the Admin E-mail and Password' section, which includes fields for 'Your E-mail', 'Admin Password', and 'Confirm Admin Password'. The main section is titled 'Load Sample Data, Restore or Migrate Backed Up Content'. It contains an 'Important!' note and three options: '1. Default sample data', '2a. A Joomla! 1.5.x compatible SQL script file', and '2b. Migrate content from previous versions of Joomla!'. A blue callout box with the text 'Please remember to install Sample Data' has an arrow pointing to the 'Install Sample Data' button. To the right of the callout box, there are radio buttons for 'Install Default Sample Data' (which is selected) and 'Load Migration Script'. Below these are fields for 'Maximum Upload Size', 'Old Table Prefix', 'Old Site Encoding', and 'Migration Script'.

Installing JV Dance template with Theme version:

You will need to install a theme managing component called JV Framework before you can install JV Dance as a theme.

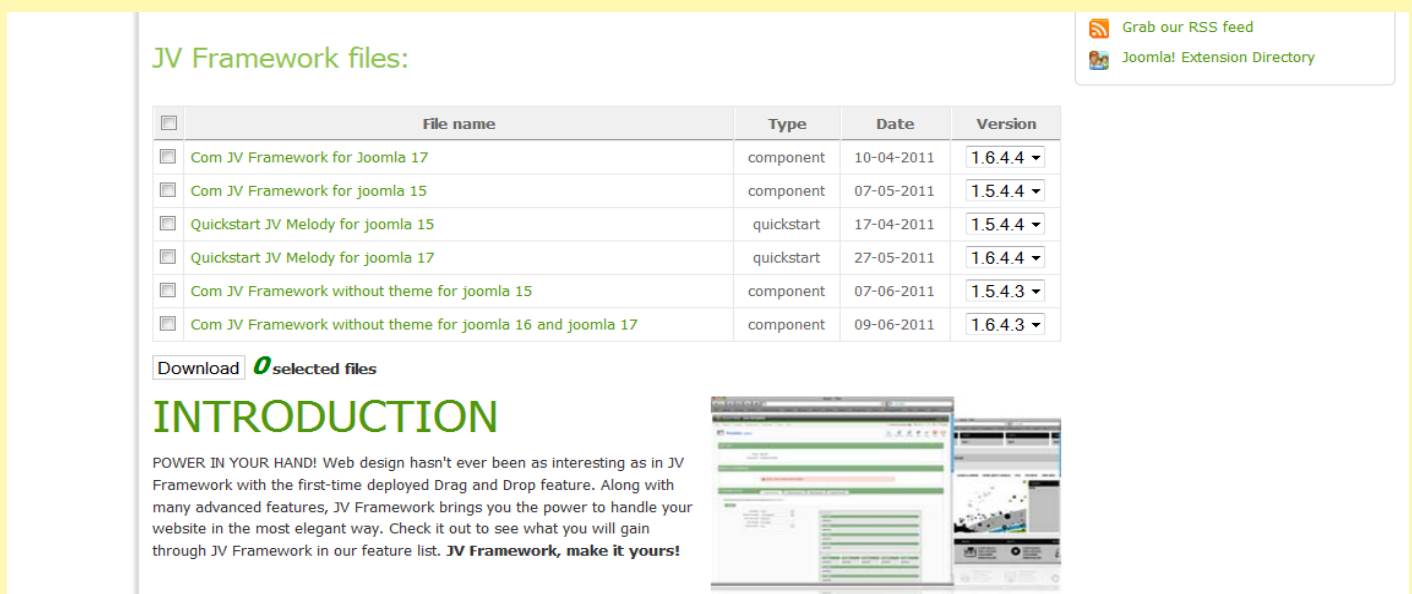

To install JV Framework:

- Click on JV Frame Work download on the upper right corner, just under user menu.

The screenshot shows the Joomla! Extensions Directory interface. At the top, there are navigation tabs for 'Joomla! templates', 'Portfolios', 'Tutorials', 'Custom Services', 'Request a Quote', and 'Joomla! Products'. A search bar is located on the right. The main content area displays two extension listings: 'JV Gplus' and 'JV Translate'. The 'JV Gplus' listing includes a description, a 'READ MORE' button, and a 'Tag: JV Gplus, Google+1 Button'. The 'JV Translate' listing includes a description and a 'Tag: JV Translate, Google Translate API'. On the right side, there is a 'User Menu' with links for 'My tickets' and 'My subscriptions'. Below the user menu, there is a 'JV Framework' section with two columns for 'Joomla! 1.5.x' and 'Joomla! 1.6.x', each containing 'Download', 'Demo', and 'Document' links. A blue callout box with an arrow points to the 'Download' links for the JV Framework component.

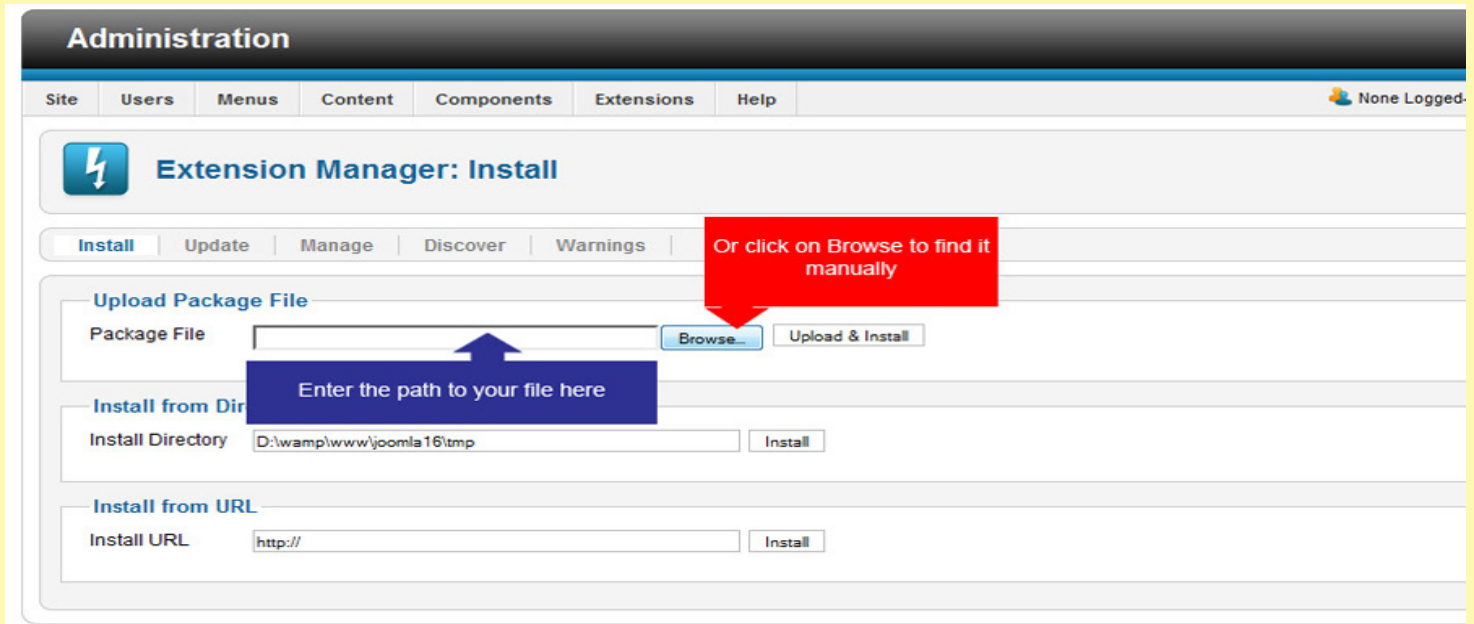

- In the download page, select the version(s) you need and click download. There are different versions for Joomla! 1.5 and Joomla 1.7, as well as quick-start versions of JV Melody and 'JV Framework without theme' versions. For the purpose of installing JV Dance on an existing site, you will need the regular or themeless versions.

The screenshot shows the Joomla! Framework files download page. At the top right, there are links for 'Grab our RSS feed' and 'Joomla! Extension Directory'. The main content area features a table of files with the following columns: File name, Type, Date, and Version. Below the table, there is a 'Download' button and a section titled 'INTRODUCTION' with the text: 'POWER IN YOUR HAND! Web design hasn't ever been as interesting as in JV Framework with the first-time deployed Drag and Drop feature. Along with many advanced features, JV Framework brings you the power to handle your website in the most elegant way. Check it out to see what you will gain through JV Framework in our feature list. **JV Framework, make it yours!**'

File name	Type	Date	Version
Com JV Framework for Joomla 17	component	10-04-2011	1.6.4.4
Com JV Framework for Joomla 15	component	07-05-2011	1.5.4.4
Quickstart JV Melody for Joomla 15	quickstart	17-04-2011	1.5.4.4
Quickstart JV Melody for Joomla 17	quickstart	27-05-2011	1.6.4.4
Com JV Framework without theme for Joomla 15	component	07-06-2011	1.5.4.3
Com JV Framework without theme for Joomla 16 and Joomla 17	component	09-06-2011	1.6.4.3

- If the file you downloaded has 'unzip_first' in its name, remember to extract the file before continuing installing.
- Log into your Joomla! back end, select extension manager (Joomla! 1.7) or Install/Uninstall (Joomla! 1.5) from the extension manager menu.
- On the install tab, type the path to your file into the blank field of 'install from package' section or click on 'browse' to find it manually
- Click on 'Upload & Install'.

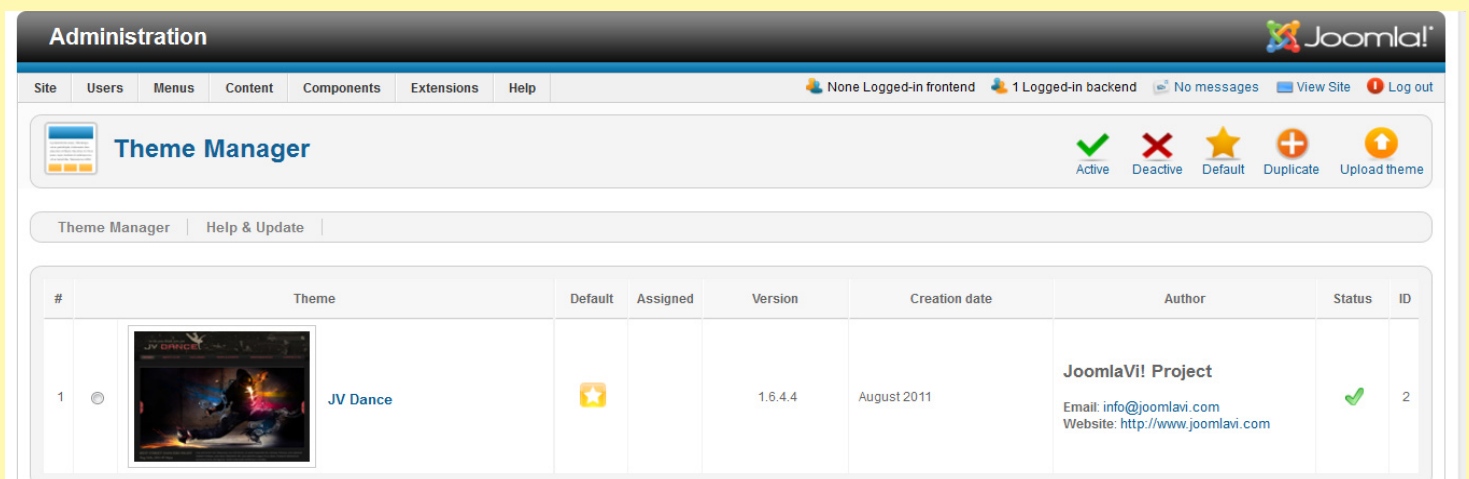

- Now you can find 'JV Framework' from the component menu.

Installing JV Dance theme

Using upload theme:

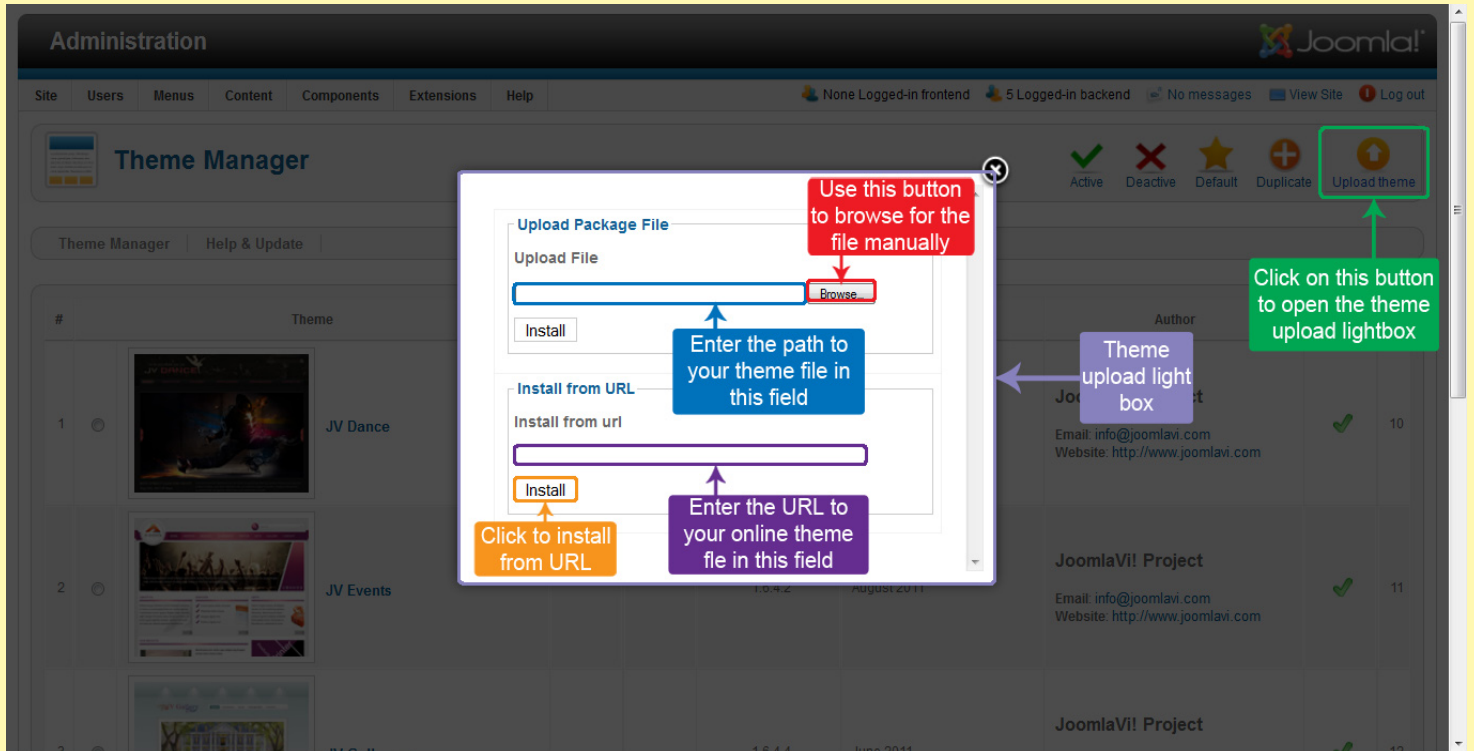

- Rename your install file and remove the number at the end, leaving only the theme's name.
- From back end, access JV Framework from component menu.

-Inside JV Framework theme manager page, click on the upload theme () button.

- type the path to your file into the blank field or click on browse to find the theme manually.

-Click on install to finish uploading the new theme.

Installing manually:

-Extract the theme's zip file.

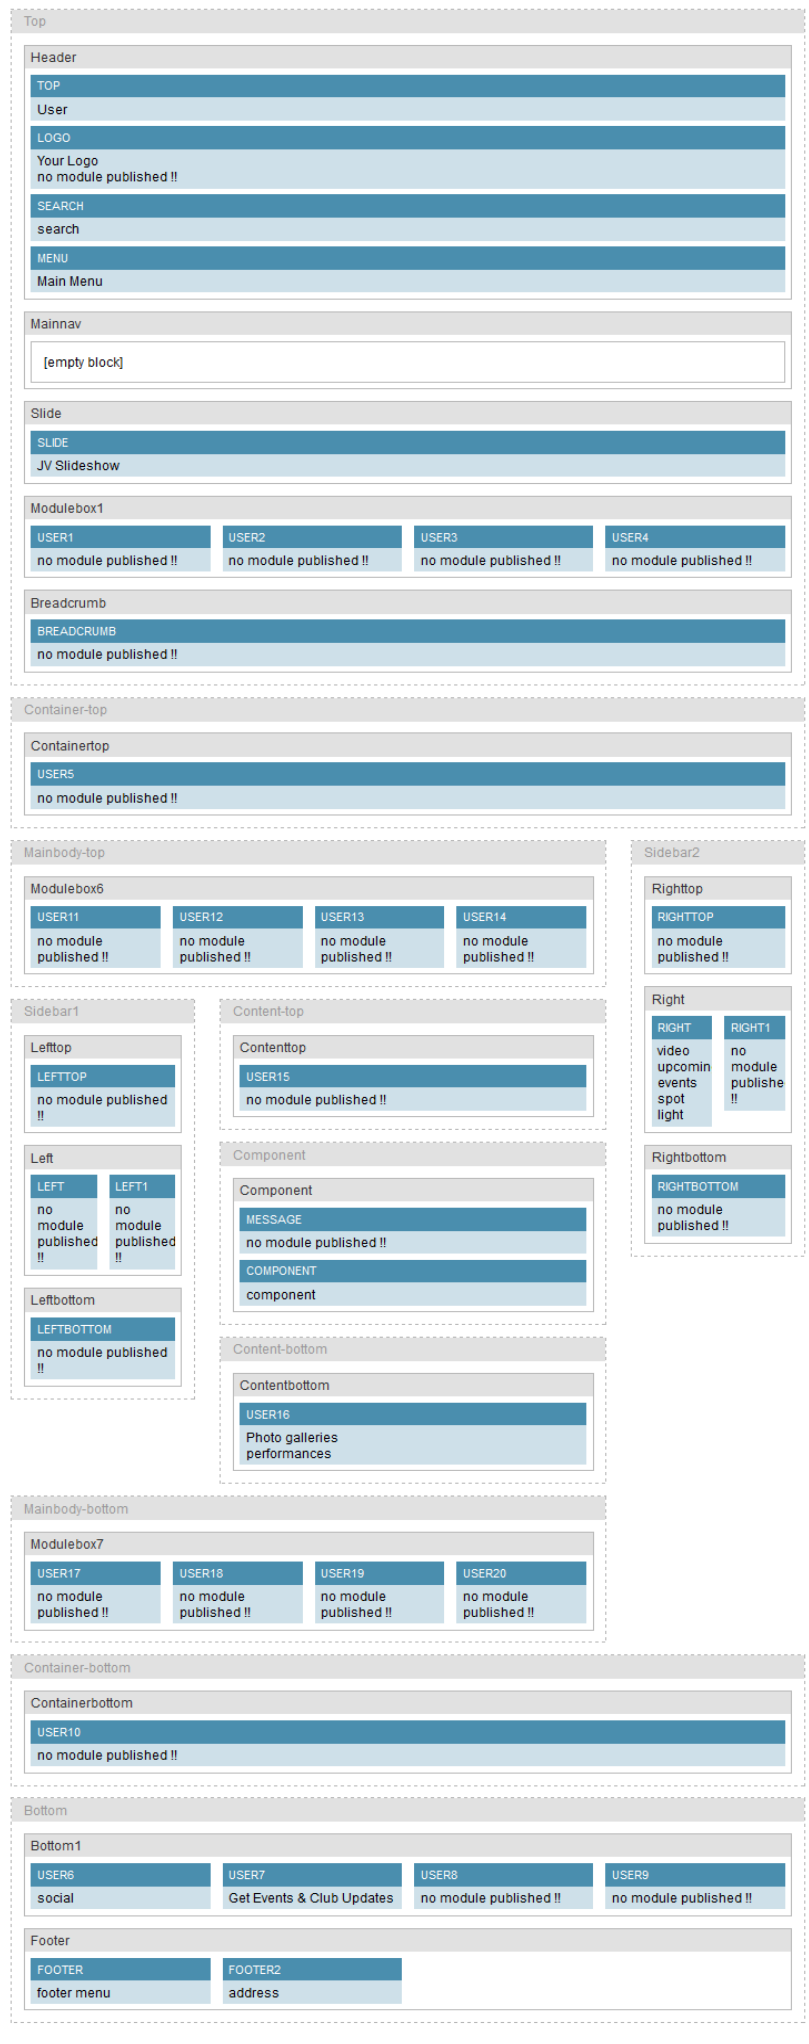

-Copy the resulting folder to <templates\jv-framework\themes> within your site's source folder.

-return to JV Framework's theme manager in your site's back end and check your theme list.

MANAGING JV DANCE WITH JV FRAMEWORK

For the basic functions of JV Framework, please refer to JV Framework User guides

The main difference between themes when using JV Framework is the position layout. The following image will show the default layout of JV Dance:

EXTENSIONS OF JV DANCE:

If you used the Quick-start version of JV Dance template, the following extensions will be included. For a JV Dance theme user, you would have to download and install these extensions manually:

JV Slider (Module)

*To replicate the Demo site, this module should be assigned to the position 'left' on on Home page.

-Prepare a folder where you store the images you wanted to use. If you want the slider to displays thumbnails instead of large images, create a 'thumbnails' folder within the aforementioned directory and store the resized images there.

-Within your site back end, go to Module Manager and click on the module's name.

-Inside Module mod, set the location to your image folders, select your source and set the parameters.

-Set the module to published/enable and select the pages where you want to display it.

-Save the setting and click on review.

For the parameters' effects, please read the JV Slider User Guide

The screenshot displays the JV Dance Joomla! template home page. The layout includes several modules:

- WELCOME TO JV DANCE:** A header section with placeholder text.
- PHOTO GALLERIES:** A module containing a slider of four images. A green box highlights this module, and a green arrow points to a callout box that reads "JV Slider / Photo Galleries".
- PERFORMANCES:** A module featuring a video player for "America's Best Dance Crew" and a "787 Crew" performance. A "Watch" button is visible below the video.
- UPCOMING EVENTS:** A module listing events like "Dance Flick" with placeholder text.
- SPOT LIGHT:** A module featuring a DJ performing at a turntable.

JV Slideshow (Module)

*To replicate the Demo site, this module should be assigned to the position 'Slide' on Home page.

Prepare a folder where you store the images you wanted to use. If you wanted to display thumbnails for your slides, create a "thumbnails" folder within the image folder and store the resized images you want to use as thumbnails there.

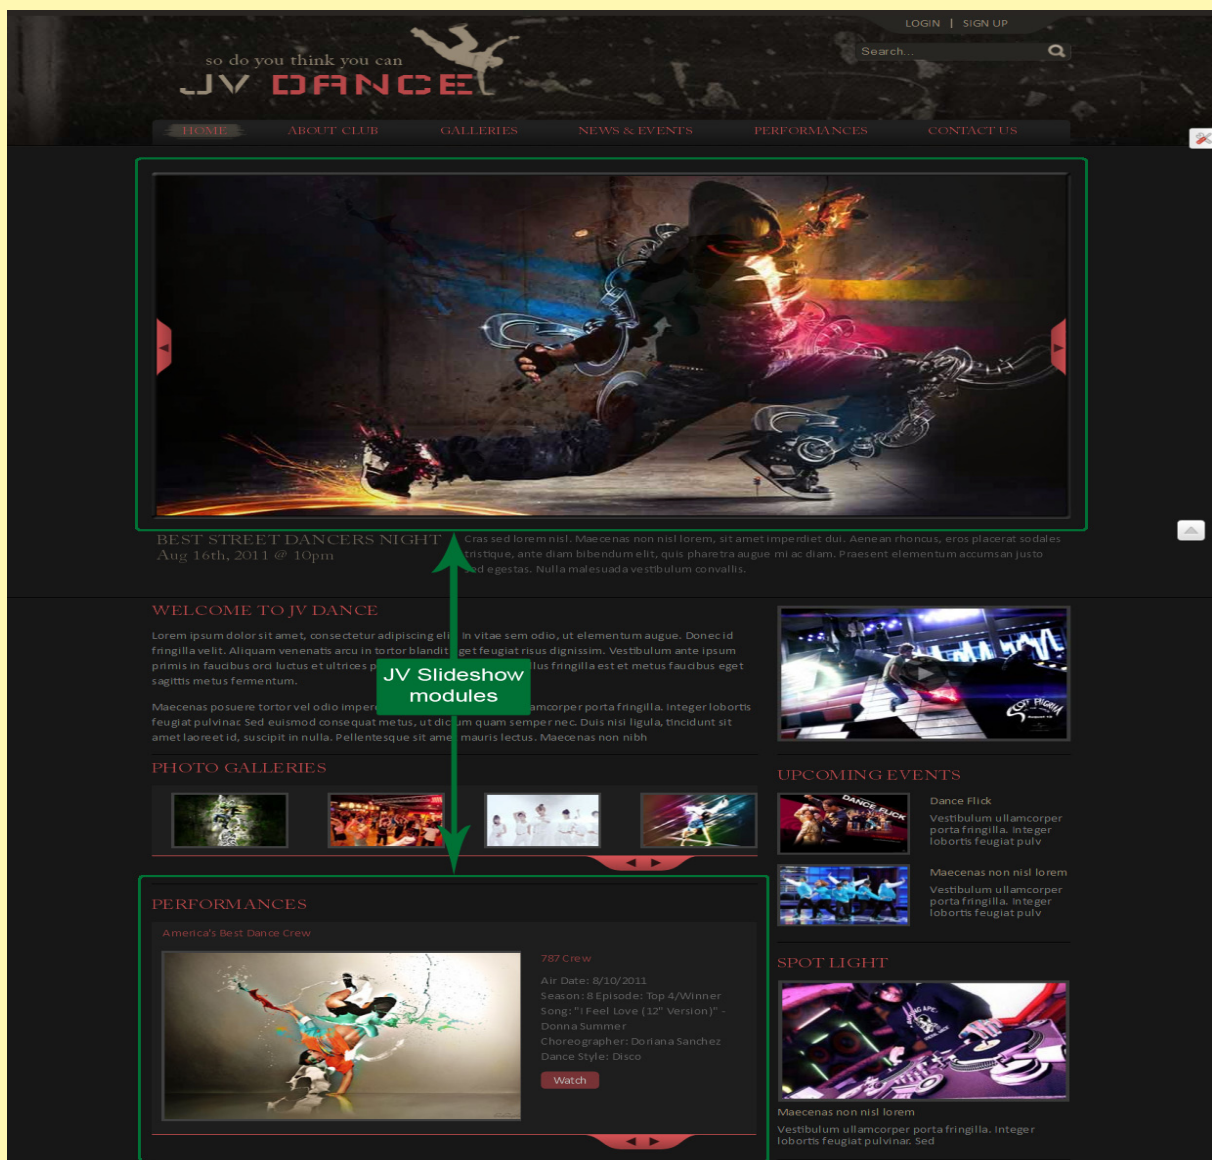

-Within your site back end, go to Module Manager and click on the module's name.

-Inside Module mod, set the location to your image folders, select your source and set the parameters.

-Set the module to published/enable and select the pages where you want to display it.

-Save the setting and click on review.

For the parameters' effects, please read the JV Slideshow User Guide

JV Photos (Module)

*To replicate the Demo site:

-Prepare a folder where you store the images you wanted to use. If you wanted to display thumbnails for your photos, create a “thumbnails” folder within the image folder and store the resized photos you want to use as thumbnails there .

-Make a module named ‘Photo galleries’ base on this module and assign it to the position ‘photo’ on all page

-Create a ‘galleries’ category, in which you create articles using the following code

```
<p><img src=<"imagelink "> border="0" alt="img" /><br />7 images</p>
```

```
<hr id="system-readmore" />
```

```
<p>{loadposition photo}</p>
```

With <"imagelink "> being the path to one of the image in the folder you created.

- Create a ‘category blog’ type menu item linked to the ‘galleries’ category.

-Within your site back end, go to Module Manager and click on the module’s name.

-Inside Module mod, set the location to your image folders, select your source and set the parameters.

-Save the setting and click on review. Then click on the ‘Galleries’ menu item.

For the parameters’ effects, please read the JV Photos User Guide

The screenshot displays a Joomla! website interface. At the top, there's a header for 'BEST STREET DANCERS NIGHT' dated 'Aug 16th, 2011 @ 10pm'. Below this, a 'PHOTO GALLERIES' module is shown, featuring a grid of four dance-related images. Each image has a caption 'America's Best Dance Crew' and a '7 images' link. A green box highlights the entire gallery area, and a green arrow points from a 'JV Photos' label below to the gallery. To the right of the gallery, there are sections for 'UPCOMING EVENTS' and 'SPOT LIGHT', each with a small image and placeholder text. The page footer includes a 'JV Photos' label with an arrow pointing to the gallery.

JV News

*To replicate the Demo site, make 2 modules named 'upcoming events' and 'spot light' base on this module, then assign them to the position 'right' on all page.

In 'upcoming events', set the parameters similar to the following images:

The image displays a Joomla! administrator interface for configuring a 'JV News' module. The settings are organized into several sections:

- Module Parameters:** Module Class Suffix is set to '-coming-events'. Alternative Layout is 'Default'. Source is 'Content'. Categories include 'Uncategorised news' and 'Upcoming events'. 'Show Category Title' and 'Show Link' are both set to 'No'.
- Leading setting:** # Leading is 0. Content options include 'Clear Images' (Yes), 'Show Title' (Yes), 'Title Link' (No), 'Created Time' (Yes), 'Author Name' (Yes), 'Print Icon' (Yes), 'E-mail Icon' (Yes), 'Show Readmore' (Yes), 'Show Content' (Yes), and 'Maxchars' (400). Thumbnail options include 'Show Thumbnails' (Yes), 'Position' (Before title), 'Align' (Center), 'Width' (100), 'Height' (100), and 'Resize' (Adaptive resize).
- Intro Setting:** # Intro is 2. Content options include 'Clear Images' (Yes), 'Show Title' (Yes), 'Title Link' (Yes), 'Created Time' (No), 'Author Name' (No), 'Print Icon' (No), 'E-mail Icon' (No), 'Show Readmore' (No), 'Show Content' (Yes), and 'Maxchars' (70). Thumbnail options include 'Show Thumbnails' (Yes), 'Position' (Before title), 'Align' (Left), 'Width' (130), 'Height' (80), and 'Resize' (Adaptive resize).
- Link Setting:** # Link is 0. 'Show tooltip' is Yes. Content Tip options include 'Clear Images' (Yes), 'Show Title' (Yes), and 'Show Content' (Yes). Maxchars is 400. Thumbnail options include 'Show Thumbnails' (Yes), 'Position' (Before title), 'Align' (Center), 'Width' (50), 'Height' (50), and 'Resize' (Adaptive resize).
- Specific Article Setting:** Article selection is empty. Content options include 'Clear Images' (Yes), 'Show Title' (Yes), 'Title Link' (No), 'Created Time' (Yes), 'Author Name' (Yes), 'PDF Icon' (Yes), 'Print Icon' (Yes), 'E-mail Icon' (Yes), 'Show Readmore' (Yes), 'Show Content' (Yes), and 'Maxchars' (400). Thumbnail options include 'Show Thumbnails' (Yes), 'Position' (Before title), 'Align' (Center), 'Width' (50), 'Height' (50), and 'Resize' (Adaptive resize).
- Pagination Setting:** 'Show Pagination' (No), 'Enable Ajax' (No), and 'Auto Play' (No) are all set to No. 'Fx Mode' is 'Show Hide', 'Fx Transition' is 'Linear', 'Ease' is 'easeIn', 'Duration' is 500, 'Time' is 5000, and 'Wait' is 0.
- Other Setting:** 'Order' is 'Default', 'Featured Articles' is 'Show', 'Columns' is 1, 'Enable Default Images' (Yes), 'Show More Articles Text' (No), and 'More Articles Text' is 'More articles'.

In 'spot light', set the parameters similar to the following images:

The image displays a Joomla! administrator interface with several configuration panels for a 'spotlight' module. The panels are as follows:

- Module Parameters:** Module Class Suffix: -spotlight; Alternative Layout: Default; Source: Content; Categories: A list including 'spotlight' (selected); Show Category Title: No; Show Link: No.
- Leading setting:** # Leading: 1; Content: Clear Images (Yes), Show Title (Yes), Title Link (Yes), Created Time (No), Author Name (No), Print Icon (No), E-mail Icon (No), Show Readmore (No), Show Content (Yes), Maxchars: 80; Thumbnail: Show Thumbnails (Yes); Position: Before title; Align: Center; Width: 290; Height: 160; Resize: Adaptive resize.
- Intro Setting:** # Intro: 0; Content: Clear Images (Yes), Show Title (Yes), Title Link (No), Created Time (Yes), Author Name (Yes), Print Icon (Yes), E-mail Icon (Yes), Show Readmore (Yes), Show Content (Yes), Maxchars: 400; Thumbnail: Show Thumbnails (Yes); Position: Before title; Align: Center; Width: 50; Height: 50; Resize: Adaptive resize.
- Link Setting:** # Link: 0; Show tooltip: Yes; Content Tip: Clear Images (Yes), Show Title (Yes), Show Content (Yes), Maxchars: 400; Thumbnail: Show Thumbnails (Yes); Position: Before title; Align: Center; Width: 50; Height: 50; Resize: Adaptive resize.
- Specific Article Setting:** Article: (empty); Content: Clear Images (Yes), Show Title (Yes), Title Link (No), Created Time (Yes), Author Name (Yes), PDF Icon (Yes), Print Icon (Yes), E-mail Icon (Yes), Show Readmore (Yes), Show Content (Yes), Maxchars: 400; Thumbnail: Show Thumbnails (Yes); Position: Before title; Align: Center; Width: 50; Height: 50; Resize: Adaptive resize.
- Pagination Setting:** Show Pagination: No; Enable Ajax: No; Auto Play: No; Fx Mode: Show Hide; Fx Transition: Linear; Ease: easeIn; Duration: 500; Time: 5000; Wait: 0.
- Other Setting:** Order: Default; Featured Articles: Show; Columns: 1; Enable Default Images: Yes; Show More Articles Text: No; More Articles Text: More articles.

For the parameters' effects, please read the JV News User Guide

JV Contact

*To replicate the Demo site, create a 'footer menu' menu (which contain the same items as main menu with the exception of the 'Submenu').

Create a menu type module linked to 'footer menu' Menu and assign it to the position 'Footer' on all pages

Afterwar create 2 menu items in the main menu and footer menu using menu item type 'JV Contact-Default Template'.

In the component, set the contact, fields and global config according to these screenshots:

This is the end of the Joomla! Template: JV Dance User Guide

I hope it'd be useful for those who took an interest in this template but had trouble figuring out how it works.

Good luck tinkering!
