

# JOOMLA! TEMPLATE: JV - EXPO USER GUIDE

## INTRODUCTION – WHAT IS JV EXPO?

The screenshot displays the JV Expo Joomla! template homepage. At the top left is the 'JV Expo' logo. To its right is a search bar with the text 'Search...' and a 'Search' button. Below the logo is a navigation menu with links for 'Home', 'Exhibitors', 'News', 'Typography', and 'Theme'. The main content area features a large banner with a background image of a modern building complex. The banner text includes 'In hac habitasse platea dictumst', 'Lorem ipsum dolor sit amet', and a paragraph of placeholder text. Below the banner is a 'Home' section with a category 'Exhibitors', a main heading 'Praesent vulputate purus odio. Proin condimentum justo vulputate justo pretium ultrices.', and a sub-heading 'Written by Super User'. To the right of the main heading is a date badge for 'June 23 2011'. Below the text is an image of a large, modern, cylindrical building. To the right of the main content is a 'Login' section with a 'Username' input field, a password field, a 'Remember Me' checkbox, and a 'Log in' button. Below the login section is an 'Events' section with two event listings. The first event is for 'Aug 25 2011' with the text 'Lorem ipsum dolor sit amet Maecenas dapibus, libero et cursus mollis, mi neque dapibus quam, vel ornare neque ante.' The second event is for 'Aug 28 2011' with the text 'Lorem ipsum dolor sit amet Class aptent taciti sociosqu ad litora torquent per conubia nostra, per inceptos himenaeos semper non nulla.'

JV Expo is Joomla! Template developed by Joomlavi group for business sites, especially those dealing with Expos and Exhibitions.

This template, like all templates developed by Joomla! group, consists of two parts: The theme managing component called JV Framework and the theme/template named JV Expo.

## DOWNLOADING JV EXPO – WHERE TO FIND IT?

To download JV Expo, you need to register a username on <http://Joomla.com> and purchase a package for download privileges.

You can find JV Expo within the “Joomla! Templates” pages (which can be accessed by hovering your mouse over “Joomla! Products” menu and select “Joomla! Templates”).

You can also go to JV Expo’s page directly using this URL: [www.joomla.com/joomla-templates/10-joomla-templates/jv-expo.html](http://www.joomla.com/joomla-templates/10-joomla-templates/jv-expo.html)

Whether you are looking for a new face for your company’s site, or you are making a business event’s site, JV Expo is our recommendation. This is one of our most favorite designs, with a bright skin, a neat structure and a layout designed to exhibit your products and showcase your contacts; all combined to give a successful and professional feel to your site. JV Expo comes with 4 color variants, K2 component support (1.5 only) as well as various means to adjust and customize the site layout rather easily. You won’t have to worry about your site’s uniqueness, since it won’t take long at all to add a personal touch. Try out JV Expo and attract more opportunities!

### Features

- Support RTL
- Quickstart (Joomla! install that includes demo data)
- Mobiles: iPhone/iPad, Android, handheld theme
- Drop and drag module position.
- Validate xhtml and CSS
- 100% tableless CSS
- CSS3 powered
- Multiple Layout Options
- Google Fonts
- SEO Optimized
- 4 Colors
- Flexible template and column widths
- Custom theme profile
- Compatible: Firefox, IE 7+, Chrome, Safari, Opera ...
- Columns: Unlimited
- Typography
- Add new position, block (unlimited number of positions and blocks), edit and delete position and block...

Within JV Expo's page, there are two set of buttons under the theme's screenshot, one for Joomla! 1.5 and one for Joomla! 1.7. Each set consists of 3 buttons: 'Live Demo', 'Download' and 'Position'

Clicking on 'Live Demo' would redirect you to a demo-site using JV Expo. This is also what your site will look like when using a Quick-start version of this template.

Clicking on 'Position' will show open up the demo-site, with all the positions visible.

Clicking on 'Download' will open the download page for either the Joomla! 1.5 version or Joomla! 1.7 version.

The screenshot shows the Joomla! template download page for JV Expo 17. The page includes a navigation menu, social media links, and a list of files for download. A blue callout box points to the checkboxes in the 'File name' column, and a red callout box points to the 'Download' button.

Download 0 selected files

Click to download images: selected file(s)

There will be multiple files in the download page. Before selecting which file(s) to download, please consider what you are planning to do.

*-If you are setting up a new site, the Quick-Start version is the best choice, because it will install an entire new site with all associated extensions and styled to look like the template's live demo.*

*-If you already have a site and don't want to replace it, or you only want the template without extensions and styling, the Theme version will be your choice. Installing a theme will give you only a new template/theme without any extra extension or data loss.*

After you have confirm the file(s) you need, select them by ticking the box(es) in front of said file(s), then click download.

If the file you downloaded has 'unzip\_first' in its name, please extract it before continuing with the installation.

## INSTALLING JV EXPO – HOW TO INSTALL JV EXPO WITH A QUICKSTART OR THEME VERSION

### Installing JV Expo template with Quick star version:

To install a QuickStart version of JV Expo, follow the following steps:

- Extract the file with 'unzip\_first' in its name.
- Extract the resulting file into a folder. For example, let name the folder 'Expo'.
- Copy or move said folder into your server's.
- Open your browser and open the URL to the folder you copied. For example, on a local host, the URL would be: http://localhost/Expo/
- Install the quickstart template the same way you install a new Joomla! instance using browser. During the installation process, you must remember to install Sample Data by clicking on the Install Sample Data button.

**Load sample data**

**Important!** It is strongly recommended that default sample data. To do this click on the button next stage.

**1. Sample data:** Before leaving the installation database with data. There are two ways to do

**1a. Default sample data** can be inserted. To Default English (GB) Sample Data is displayed the Install Sample Data button.

**1b. Custom sample data** can be inserted. To do this, choose an available sample data in the dropdown and click the Install Sample Data button.

**2. Clean Installation:** If you wish to perform a clean installation, enter the site name, admin email and choose a password. Then proceed to the final step by clicking *Next*.

Sample Data set Default English (GB) Sample Data

Install Sample Data

*Installing sample data is strongly recommended for a complete installation package.*

Please remember to install Sample Data

## Installing JV Expo template with Theme version:

You will need to install a theme managing component called JV Framework before you can install JV Expo as a theme.

### Installing JV Framework:

- Click on JV Frame Work download on the upper right corner, just under user menu.
- In the new page, select the version(s) you need and click download. There are different versions for Joomla! 1.5 and Joomla 1.7. From JV Framework version 4.5 and newer, the 'install file' can be used for all version of Joomla!.
- If the file you downloaded has 'unzip\_first' in its name, remember to extract the file before continuing installing. The resulting file(s) from extracting an 'unzip\_first' file will be called 'install file(s)' henceforth,
- Log into your Joomla! back end, select extension manager (Joomla! 1.7) or Install/Uninstall (Joomla! 1.5) from extension manager menu.

The screenshot displays the Joomla! Administration interface for the 'Extension Manager: Install' section. The top navigation bar includes 'Site', 'Users', 'Menus', 'Content', 'Components', 'Extensions', and 'Help'. The 'Extensions' menu is active. The main content area is titled 'Extension Manager: Install' and features a lightning bolt icon. Below the title are tabs for 'Install', 'Update', 'Manage', 'Discover', and 'Warnings'. The 'Install' tab is selected. The 'Upload Package File' section has a 'Package File' input field with a 'Browse...' button and an 'Upload & Install' button. A red callout box points to the 'Browse...' button with the text 'Or click on Browse to find it manually'. Below this is the 'Install from Directory' section with an 'Install Directory' input field containing 'D:\wamp\www\joomla16\tmp' and an 'Install' button. A blue callout box points to the 'Package File' input field with the text 'Enter the path to your file here'. The 'Install from URL' section has an 'Install URL' input field containing 'http://' and an 'Install' button. At the bottom, the Joomla! logo and version 1.6.5 are displayed.

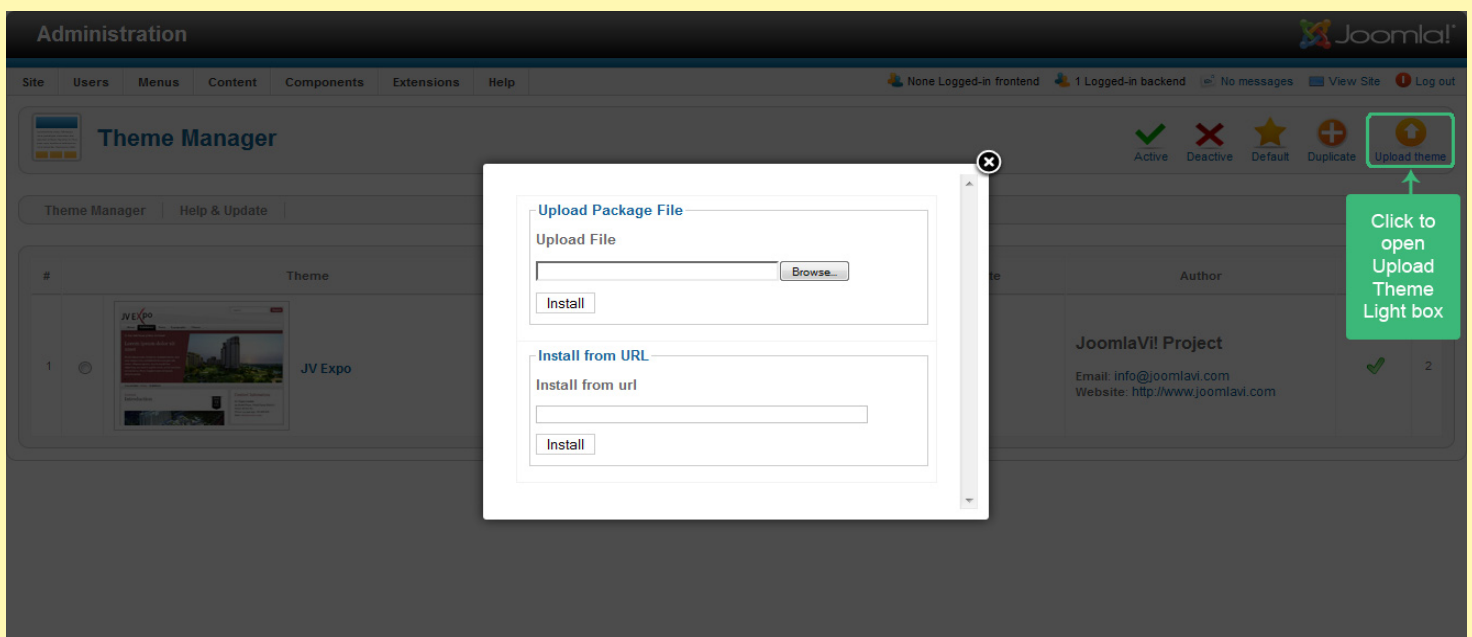

- On install tab, type the path to your file into the blank field of 'install from package' section or click on 'browse' to find it manually
- Click on 'Upload & Install'.
- Now you can find 'JV Framework' from the component menu.

## Installing JV Expo theme

### Using upload theme:

#### **\*Version 4.4 (1.5.4.4 or 1.7.4.4) or older:**

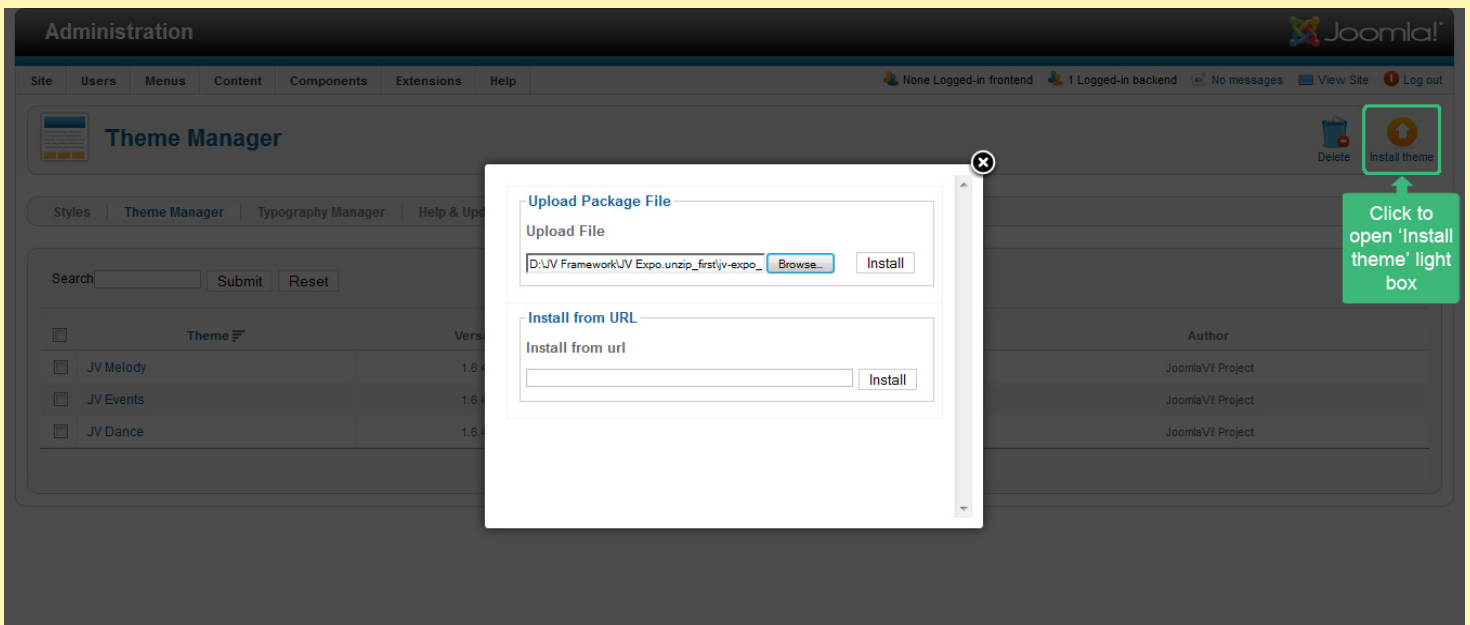

- Rename your install file and remove the number at the end, leaving only the theme's name.
- From back end, access JV Framework from component menu.
- Inside JV Framework theme manager page, click on the upload theme button.

- type the path to your file into the blank field or click on browse to find the theme manually.
- Click on install to finish uploading the new theme.

#### **\*Version 4.5 or newer:**

- From back end, access JV Framework from component menu.
- Click on tab 'Theme manager' tab.
- Inside JV Framework Theme manager page, click on the 'Install theme' button.
- Type the path to your file into the blank field or click on browse to find the theme manually.

-Click on install to finish uploading the new theme.

### **Installing manually:**

-Extract the theme's 'install file'.

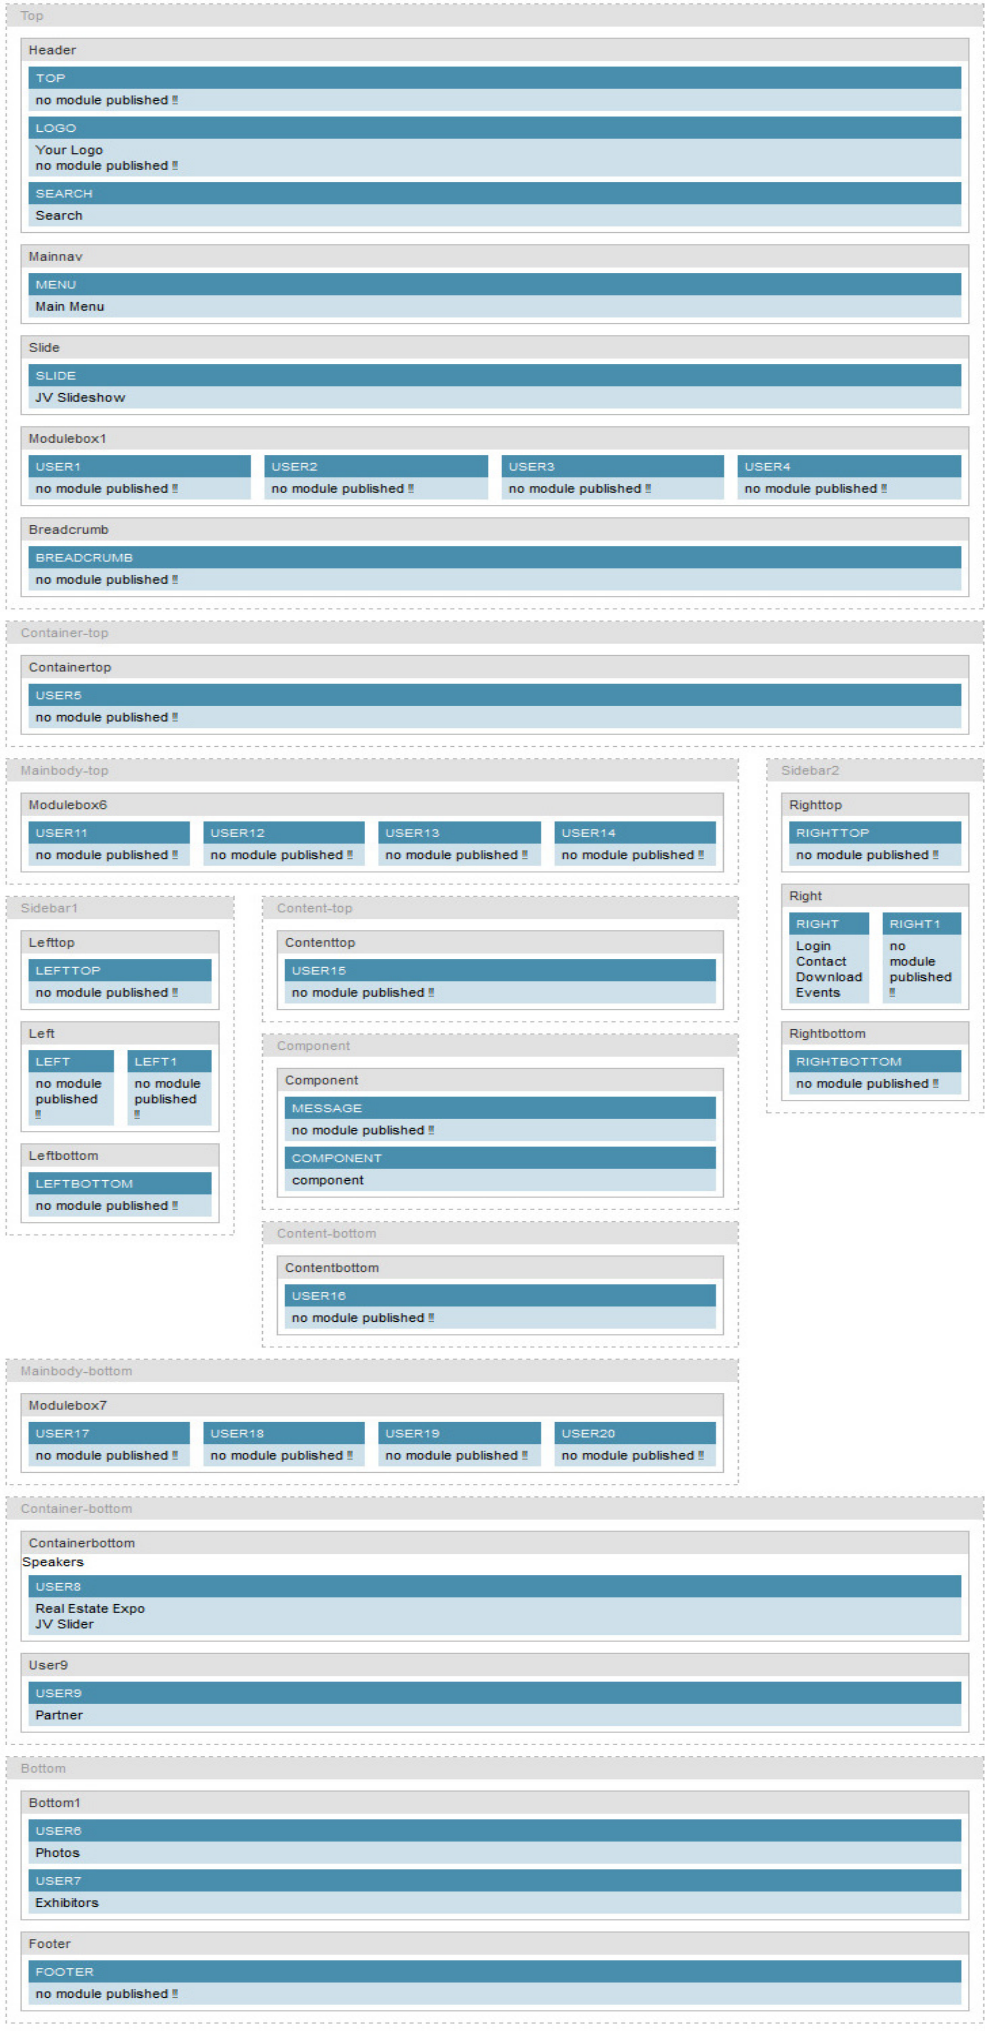

-Copy the resulting folder to <templates\jv-framework\themes> within your site's source folder.

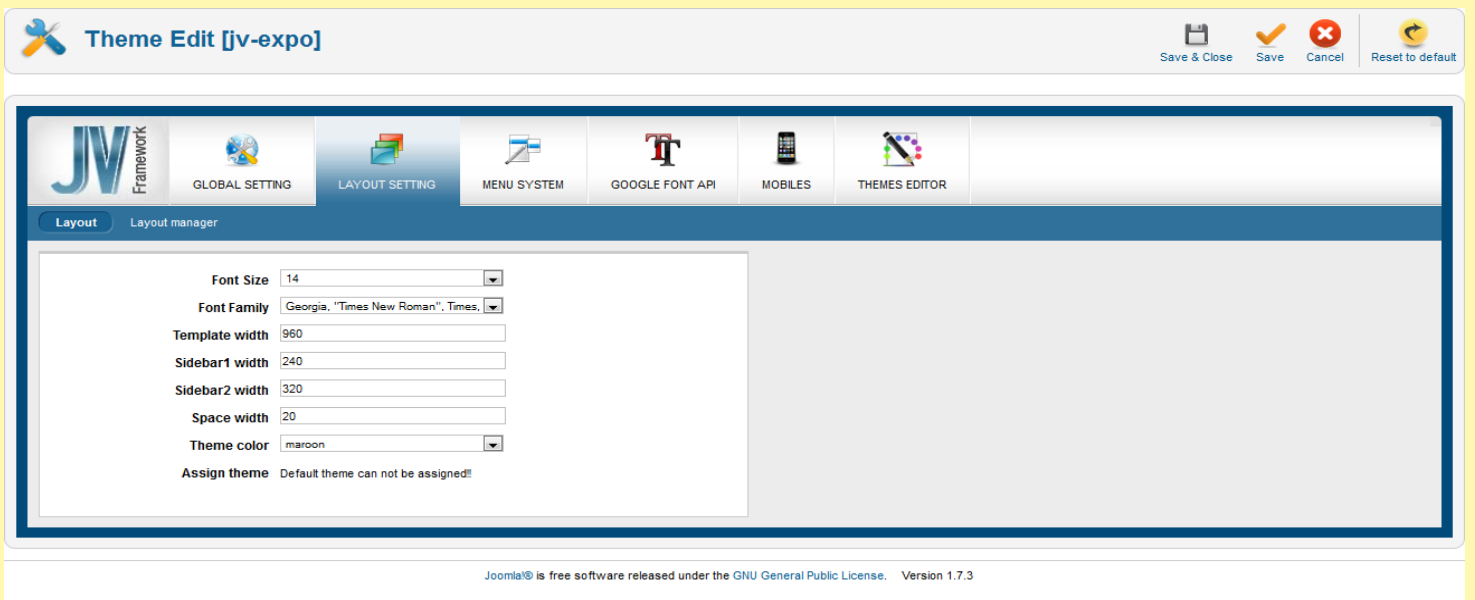

-return to JV Framework's theme manager in your site's back end and check your theme list.

## **MANAGING JV EXPO WITH JV FRAMEWORK – JV EXPO LAYOUT**

For the basic functions of JV Framework, please refer to JV Framework User guides

The main difference between themes when using JV Framework is the position layout. The following image will show the default layout of JV Expo:

## EXTENSIONS OF JV EXPO

If you used the Quick-start version of JV Expo template, the following extensions will be included, styling included. For a JV Expo theme user, you would have to download and install these extensions manually:

### JV Slideshow (Module)

\*To replicate the Demo site, this module should be assigned to the position 'Slide' on all pages.

-Prepare a folder where you store the images you wanted to use. If you wanted to display thumbnails for your slides, create a "thumbnails" folder within the image folder and store the resized images you want to use as thumbnails there .

-Within your site back end, go to Module Manager and click on the module's name.

-Inside Module mod, set the location to your image folders, select your source and set the parameters.

-Set the module to published/enable and select the pages where you want to display it.

-Save the setting and click on Preview (Joomla! 1.5) or View Site (Joomla! 1.7).

For the parameters' effects, please read JV Slideshow User Guide

## JV Slider (Module)

\*To replicate the Demo site, this module should be assigned to the position 'user8' on on all pages.

-Prepare a folder where you store the images you wanted to use. If you want the slider to displays thumbnails instead of large images, create a 'thumbnails' folder within the aforementioned directory and store the resized images there.

-Within your site back end, go to Module Manager and click on the module's name.

-Inside Module mod, set the location to your image folders, select your source and set the parameters.

-Set the module to published/enable and select the pages where you want to display it.

-Save the setting and click on review.

For the parameters' effects, please read the JV Slider User Guide

The screenshot displays a Joomla! website template. At the top, a 'JV Slider' module features four real estate agents: Richard Lee, Stacey Harmon, Michael Maher, and Raleigh Pinskey, each with a portrait and title 'Real Estate Reporter, Business Press'. Below this is a 'Partner' banner with logos for Naraghi Real Estate, Nova Realty Group, Shoaf Real Estate Group, My Loan Plus, and Sunderland Realty. The main content area is divided into 'Photos' and 'Exhibitors'. The 'Photos' section shows four images of a modern building complex, each with the caption 'Etiam Condimentum Purus Non Arcu'. The 'Exhibitors' section lists statistics: 4.59 square km (Expo site area), 198 participants, 10 million visitors, and 129+ events. A 'PAVILIONS REGISTRATION' button is located at the bottom of the Exhibitors section. A copyright notice at the bottom reads: 'Copyright © 2011 JV-Expo. All Rights Reserved. Joomla! Template by JoomlaLavi.com'.

## JV Gallery (Plug-in):

\* To replicate the Demo site:

Create a folder in your website's directory and upload your image to that folder.

If you want to use thumbnails, create another folder named 'thumbnail' in the aforementioned one and upload the thumbnails to it (the thumbnails should have the same name as their respective full size versions)

Create a Custom HTML module named 'Photos' and assign it to position 'user6' on all pages.

Set up a gallery with the images you upload in this module using gallery code or the 'Insert Gallery' button.

Creating/inserting a gallery:

-As a module:

- + Go to Module Manager within Extensions Menu

- + Create a new module with the custom html module type and scroll down to Custom Output section.

- + If you have installed the button plugin, click on 'insert gallery' and configure the properties of your gallery (see Insert Gallery's property box), then click on 'insert'

- + If you only installed the system plugin, manually type down the code in this pattern:

```
{jvgallery folder="images/gallery" theme="1" height="100" width="120" cols="0" }  
5cm 1.jpg="title|desc" 5cm 2.jpg="title|desc" 5cm 3.jpg="title|desc" {/jvgallery}
```

-Inserting a gallery into a new or existing articles/description:

- + Go to Content menu, Article Manager. If you want to create a K2 Article, use the K2 choice within Components menu.

- + Create a new article or edit an existing one. For K2, use New Item or choose Item, then click on 'new' for a new article or an item's name to edit an existing article.

- + If you have installed the button plug-in, click on 'insert tab' and configure the properties of your gallery (see Insert Tab property box below), then click on 'insert'

- + If you only installed the system plug-in, manually type down the code in this pattern:

```
{jvgallery folder="images/gallery" theme="1" height="100" width="120" cols="0" }  
5cm 1.jpg="title|desc" 5cm 2.jpg="title|desc" 5cm 3.jpg="title|desc" {/jvgallery}
```

## - Insert Gallery's Property Box

+Choose Folder: Select the folder where the images for your gallery are stored

+Title and description: Allow you to set the images' titles and descriptions.

After you have selected the folder, image names will be shown in this field in the following pattern: <image name>="title|desc"

Replace 'title' with the title you want to assign to that image and 'desc' with that image's description.

For more info, please read JV Gallery's document.
