

# Joomla! Extension User Guide: JV Login

JV Login is a Joomla! module that creates a login box for your site, normal or pop up style.

## Downloading and installing JV Login

### Downloading

- Register an account on <http://www.joomlavi.com/>
- You can look for JV Login manually within the extensions list (Joomla! Products → Joomla! Extensions) or use this link: <http://www.joomlavi.com/joomla-extensions/extension/60-jv-login/3.html>
- In the JV Login page, select JV Login and click download. Unlike most other JV modules, there is only one JV-Login module for both Joomla! versions.

The screenshot shows the Joomla! extension page for JV Login. The page includes a header with the extension name and version compatibility (1.5 NATIVE, 1.6 NATIVE, JOOMLA 1.7). Below the header is a social media section with a +1 button and a Tweet button. The main content area displays the extension details, including the parent category (Joomla! Products), category (Joomla! Extensions), developer (www.joomlavi.com), website (www.joomlavi.com), demo (http://demo.joomlavi.com/#jv-realtime), support (http://www.joomlavi.com/support.html), license (GPLv3 or later), tag (JV Login), and hits (2535). Below the details is a section titled 'JV Login files:' which contains a table with columns for File name, Type, Date, and Version. The table lists one file: 'JV Login' (module) dated 19-07-2011 with version 1.0.0.0. A 'Download' button is located below the table. Annotations include a blue box on the left with the text 'Select the file to download by clicking on this box' pointing to the 'Download' button, and a red box on the right with the text 'Click on this button to download the selected file' pointing to the 'Download' button.

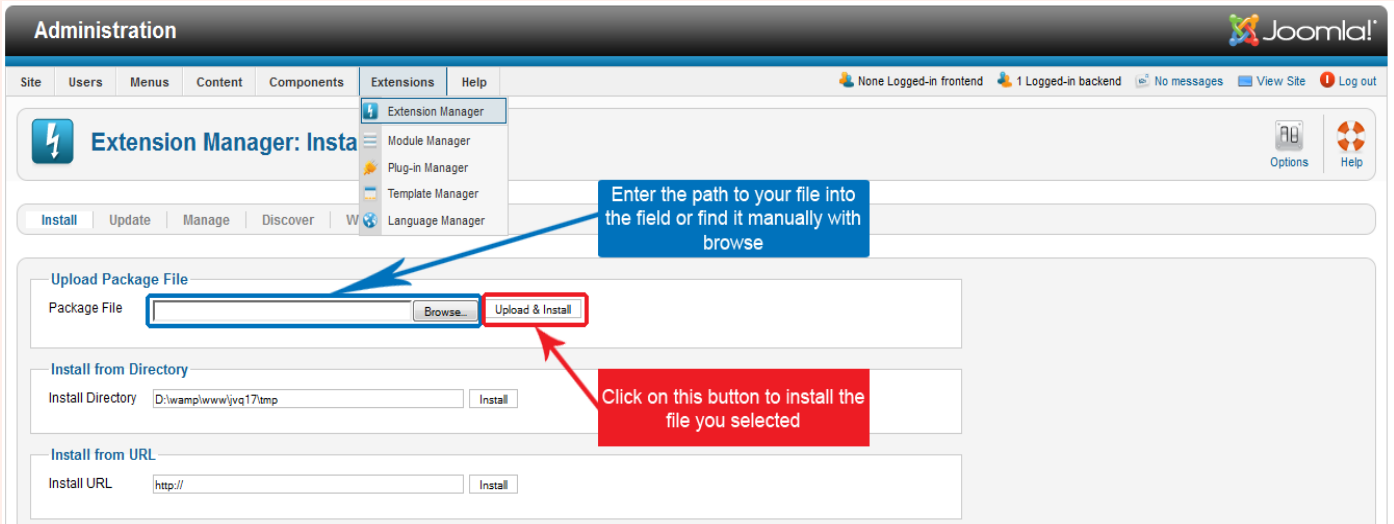

File name	Type	Date	Version
JV Login	module	19-07-2011	1.0.0.0

- If the file you download has unzip\_first in its name, please extract it before continuing with installation.

## Installing

- Go to your website's administration page, open Extensions menu and select Install/Uninstall (Joomla! 1.5) or Extensions Manager (Joomla! 1.7)

- On "install" tab, in the 'upload package file" section, you can either type the path to your file into the blank field or click on 'Browse' to find it manually.

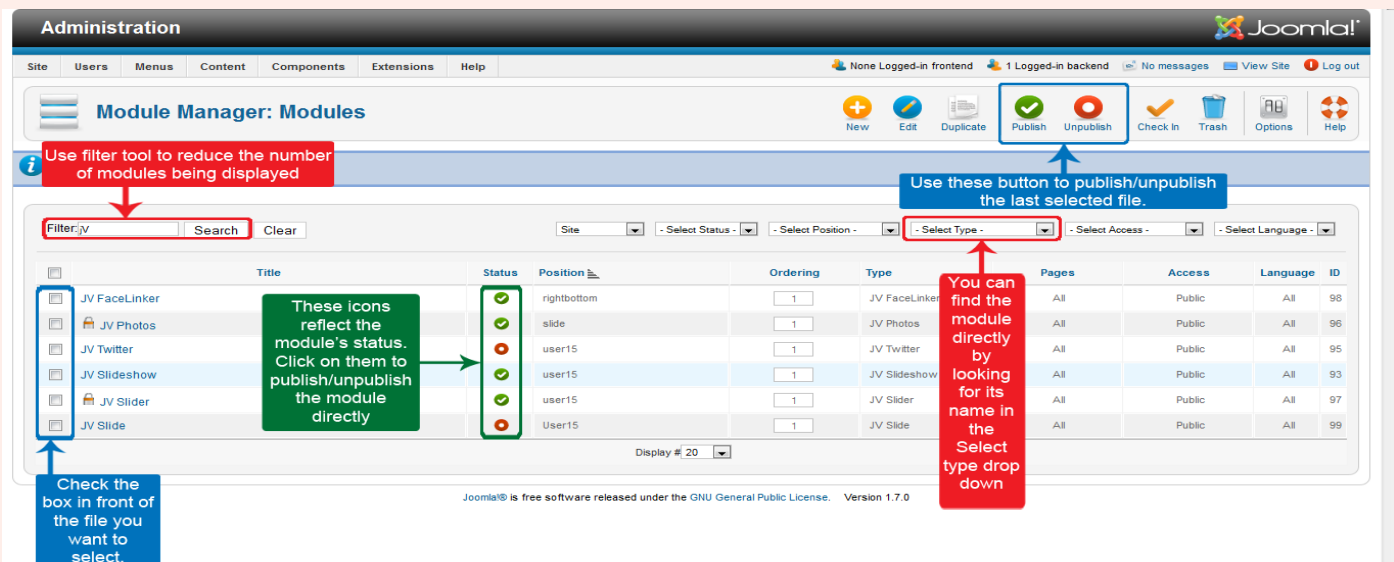

- Click on 'Upload File & Install'. JV Login's installation is now completed.

## Activating

-Go to Module Manager (Extensions menu → Module Manager)

-Search for JV Login by making use of the filter or looking for JV Login's name from the select type menu.

-Check whether JV Login is enabled or disable. If it's disabled, enable by clicking on the status icon found in the 'Enabled' (Joomla! 1.5) or 'Status' (Joomla! 1.7) column. You can also enable JV Login by selecting it, then click on the 'Enable' button.

## JV Login Module Mod

Click on JV Login's name within Module Manager to enter its configure/edit menus

There are 4 Option boxes/menus:

Details, Menu Assignment, Module Parameters (Joomla! 1.5)/Basic Options (Joomla! 1.7) and Module Advance Parameters(Joomla!1.5)/Advance Options(Joomla! 1.7).

Detail and Menu Assignment are Joomla! default Options boxes/menus and won't be focused on, but make sure you that you assigned the module to the right position and menu item(s).

Module Parameters (Joomla! 1.5)/Basic Options (Joomla! 1.7) and Module Advance Parameters(Joomla!1.5)/Advance Options(Joomla! 1.7) are the custom menus and the main focus of this guide.

The screenshot shows the Joomla! Module Manager configuration page for the JV Login module. The page is divided into several sections: 'Details' (left), 'Menu Assignment' (bottom left), 'Basic Options' (top right), and 'Advanced Options' (bottom right). Annotations include: a blue box around 'Details' with an arrow pointing to the 'Title' field; a blue box around 'Default Joomla! Options' with an arrow pointing to the 'Position' dropdown; a green box around 'Menu Assignment' with an arrow pointing to the 'Module Assignment' dropdown; a green box with the text 'Make sure you assigned the module to the right position and menu items.' with arrows pointing to the 'Position' dropdown and the 'Menu Selection' table; a red box around 'Basic Options' with an arrow pointing to the 'Module Class Suffix' field; and a red box around 'Advanced Options' with an arrow pointing to the 'Show remember' field. The 'Menu Selection' table shows a list of menu items with checkboxes, including '- Welcome', '- Contact Us', '- Login', '- Directions', and '- Welcome'.

## The result

After you have finished setting the parameters/option, click on Save 

(Joomla! 1.5) or Save & Close  (Joomla! 1.7) to save and close

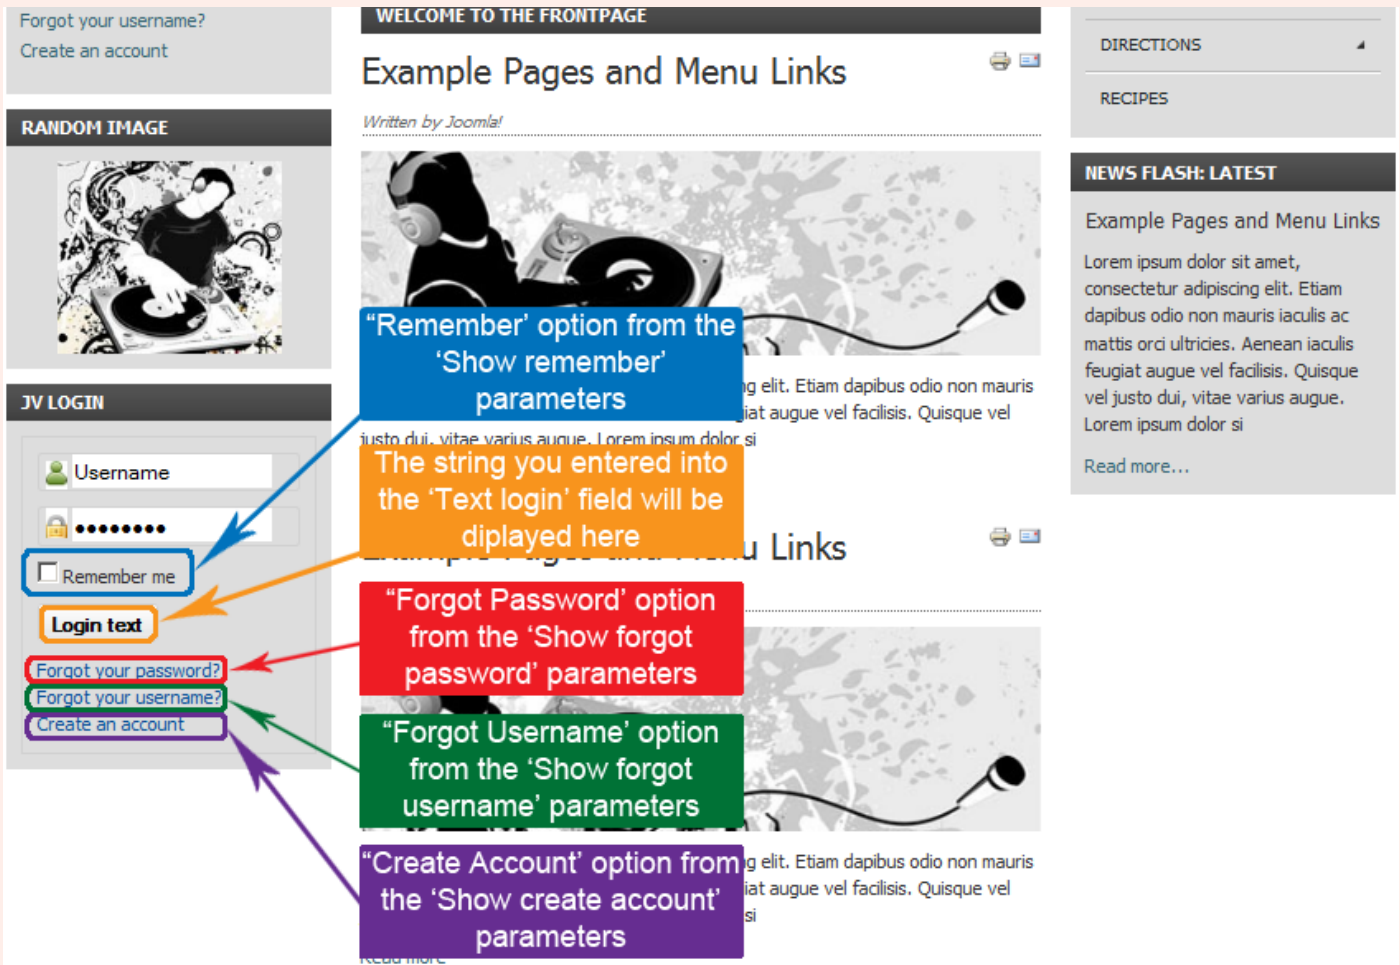

Module Mod; Apply  (Joomla! 1.5) or Save  (Joomla! 1.7) to save

without closing Module Mod.

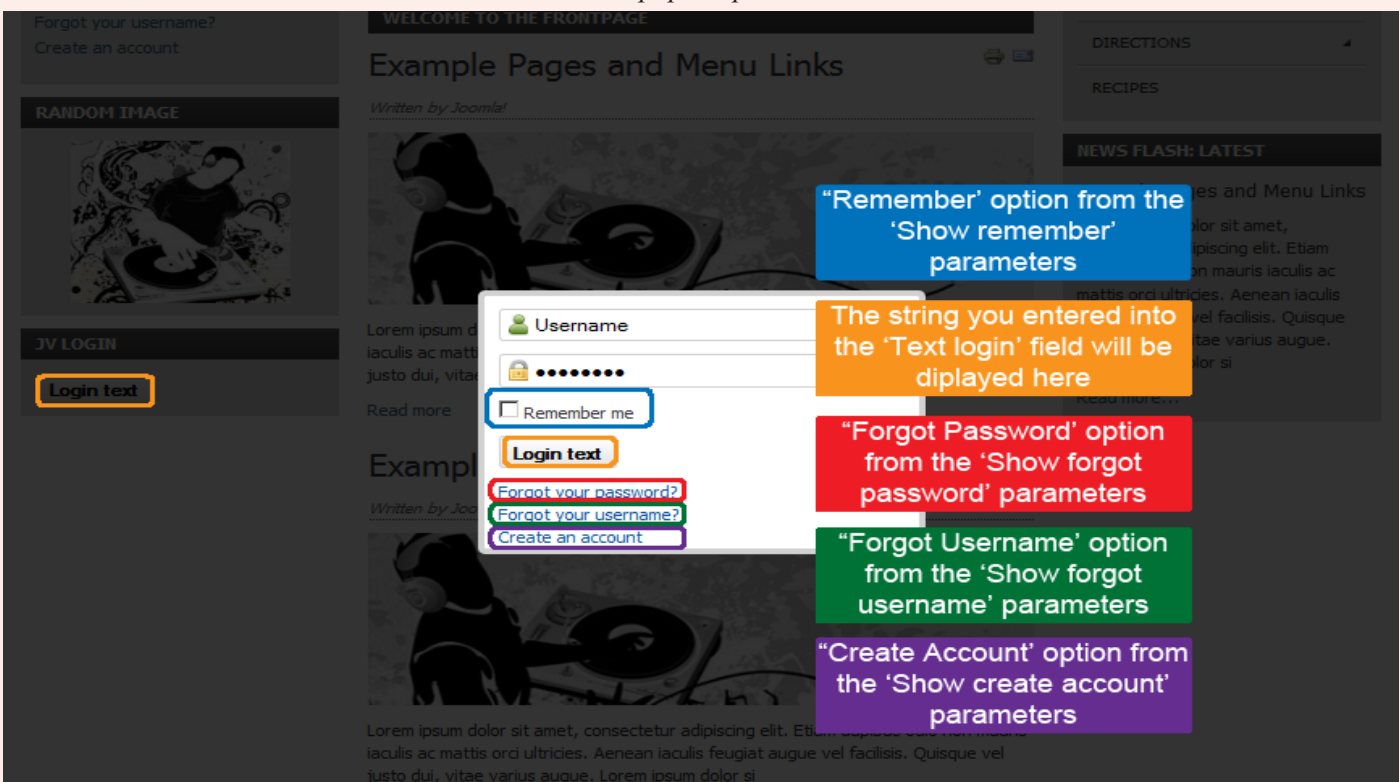

To see the result of your setting, click on Preview  Preview (Joomla! 1.5) or View site  (Joomla! 1.7).

If there is no problem with the parameters, the result should look like the following images:

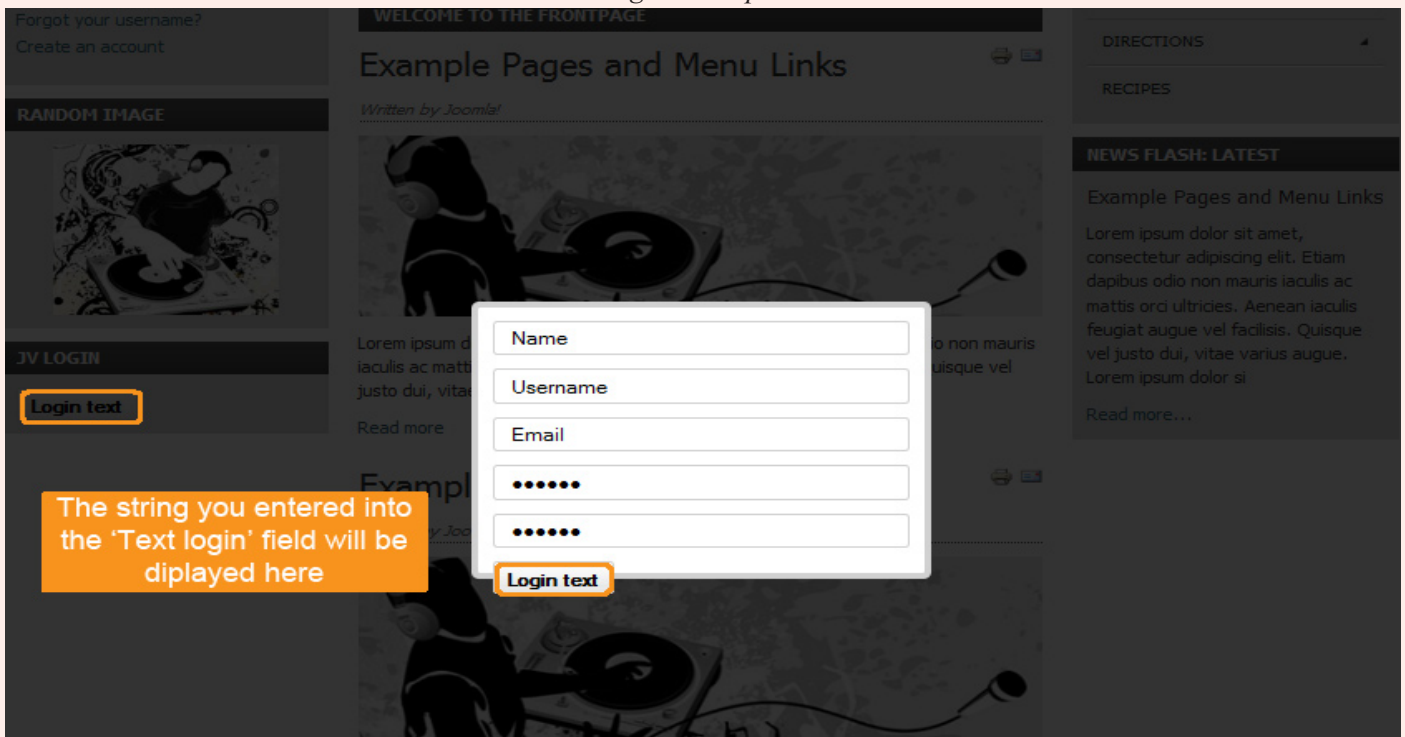

*Default template*

*Popup template*

Register template

*This is the end of the “JV Login for Joomla!” User Guide*

*I hope it'd be useful for those who took an interest in this Extension but had trouble figuring out how it works.*

*Good luck tinkering!*
