

JV Slide: Extension for Joomla! User Guide

Downloading and installing JV Slide

Downloading

- Register an account on <http://www.joomlavi.com/>
- You can look for JV Slide manually within the extensions list (Joomla! Products → Joomla! Extensions) or use this link: <http://www.joomlavi.com/joomla-extensions/extension/55-jv-slide/3.html>
- In the JV Slide page, select the version(s) you need and click download. There is a JV-Slide module for each Joomla! version.

The screenshot shows the Joomla! extension page for JV Slide. The page includes a navigation bar with links like 'Joomla! Templates', 'Portfolios', 'Tutorials', 'Custom Services', 'Request a Quote', and 'Joomla! Products'. Below the navigation bar, there are social media sharing options (Like, Tweet) and a 'Be the first of your friends to like this.' button. The main content area displays the extension details, including the parent category 'Joomla! Products', category 'Joomla! Extensions', developer 'www.joomlavi.com', website 'www.joomlavi.com', demo 'http://demo.joomlavi.com/#j16/jv-gallery', support 'http://www.joomlavi.com/support.html', license 'GPLv3 or later', tag 'JV Slide', and hits '5131'. A table lists the available files for download:

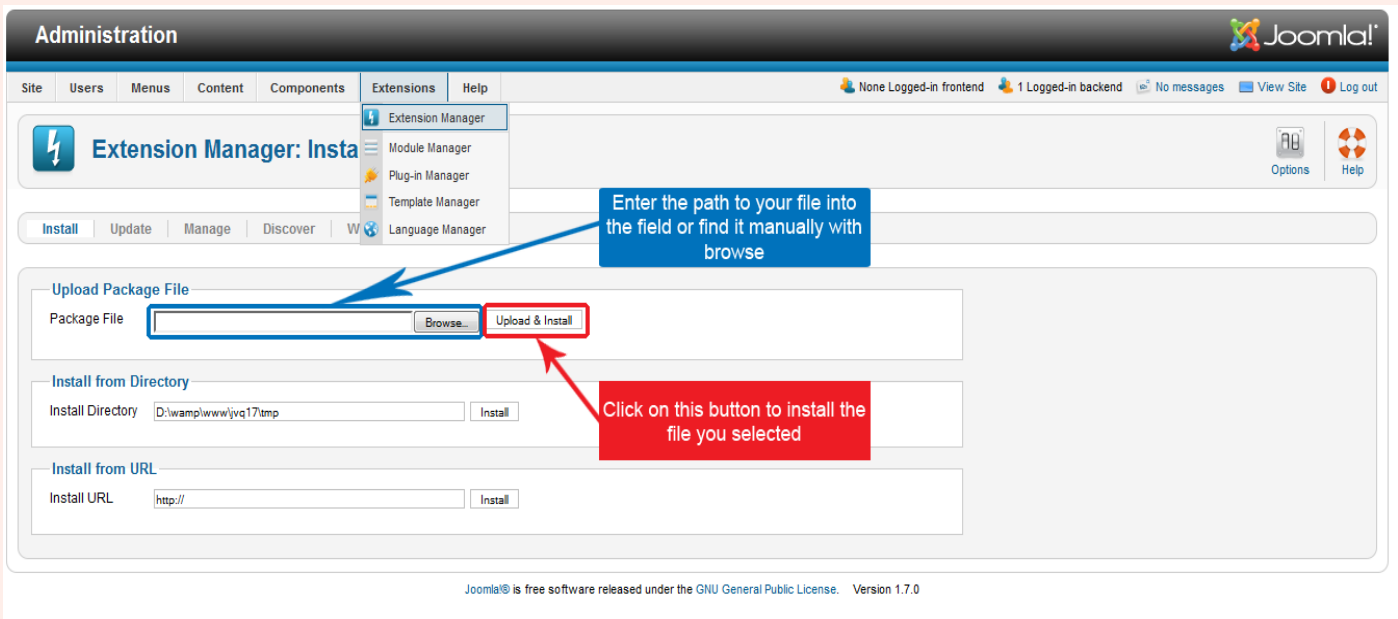

<input type="checkbox"/>	File name	Type	Date	Version
<input type="checkbox"/>	Mod JV Slide 15	module	04-07-2011	1.5.0.0
<input type="checkbox"/>	Mod JV Slide 17	module	04-07-2011	1.7.0.0

Below the table, there is a 'Download' button and a '0 selected files' indicator. Annotations include a blue box pointing to the checkboxes with the text 'Select the file(s) you want to download by checking these boxes' and a red box pointing to the 'Download' button with the text 'Once you are done selecting file(s), click this button to start download'.

- If the file you download has unzip_first in its name, please extract it before continuing with installation.

Installing

- Go to your website's administration page, open Extensions menu and select Install/Uninstall (Joomla! 1.5) or Extensions Manager (Joomla! 1.7)
- On "install" tab, in the 'upload package file' section, you can either type the path to your file into the blank field or click on 'Browse' to find it manually.
- Click on 'Upload File & Install'. JV Slide's installation is now completed.

Activating and Using JV Slide

Activating

- Go to Module Manager (Extensions menu → Module Manager)
- Search for JV Slide by making use of the filter or looking for JV Slideshow's name from the select type menu.
- Check whether JV Slide is enabled or disable. If it's disabled, enable by clicking on the status icon found in the 'Enabled' (Joomla! 1.5) or 'Status' (Joomla! 1.7) column. You can also enable JV Slide by selecting it, then click on the 'Enable' button.

Joomla! is free software released under the GNU General Public License. Version 1.7.0

Annotations:

- Check the box in front of the file you want to select.
- These icons reflect the module's status. Click on them to publish/unpublish the module directly.
- You can find the module directly by looking for its name in the Select type drop down.

Using JV Slide

Before configuring JV Slide, you must create a folder on your server where you store the images you want to use.

Click on JV Slide's name within Module Manager to enter its configure/edit menu

There are 4 Option boxes/menus:

Details, Menu Assignment, Module Parameters (Joomla! 1.5)/Basic Options (Joomla! 1.7) and Module Advance Parameters(Joomla!1.5)/Advance Options(Joomla! 1.7).

Detail and Menu Assignment are Joomla! default Options boxes/menus and won't be focused on, but make sure you that you assigned the module to the right position and menu item(s).

-Path: This is where you enter the path to your image folder.

-Custom list images: This is where you set the images you want to use, as well as assigning title, redirect links and description to those images.

+Adding image: To add an image to the list, simply click on the  button, a box will be created with the following parameters:

***image:** The name of the image you want to add (must be in the folder provided by 'Images location')

***Redirect:** If you want to link the image to a page or another site, type the location of that page/site here.

***Description:** The description you want to assign to the image.

*  **(Close/Delete) button:** Delete the image from list.

+**Swapping images' order:** To swap the order of images, click on the slide name, then drag and drop it to the desire position/order.

+

-**Show control:** You can set the control arrows to “*always*” appear, only appear when you “*hover*” the cursor over it, or disabled altogether (“*none*”)

-**Show description:** You can set the description to “*always*” appear, only appear when you “*hover*” the cursor over it, or disabled altogether (“*none*”)

-**Panel height:** This parameter affects the height of your slide’s panel.

-**Padding top:** This is where you set your top padding (the padding between image and panel’s top)

-**Space:** The space between ‘larger image’ and ‘smaller images’.

-Duration: The amount of time it takes to switch from one image to another.

-Large width: The width of the 'larger image'

-Large height: The height of the 'larger image'

-Small width: The width of the 'smaller images'

-Small height: The height of the 'smaller images'

-Description height: The height of the description box.

Module Advance Parameters/Advance Options

▼ **Advanced Options**

Template

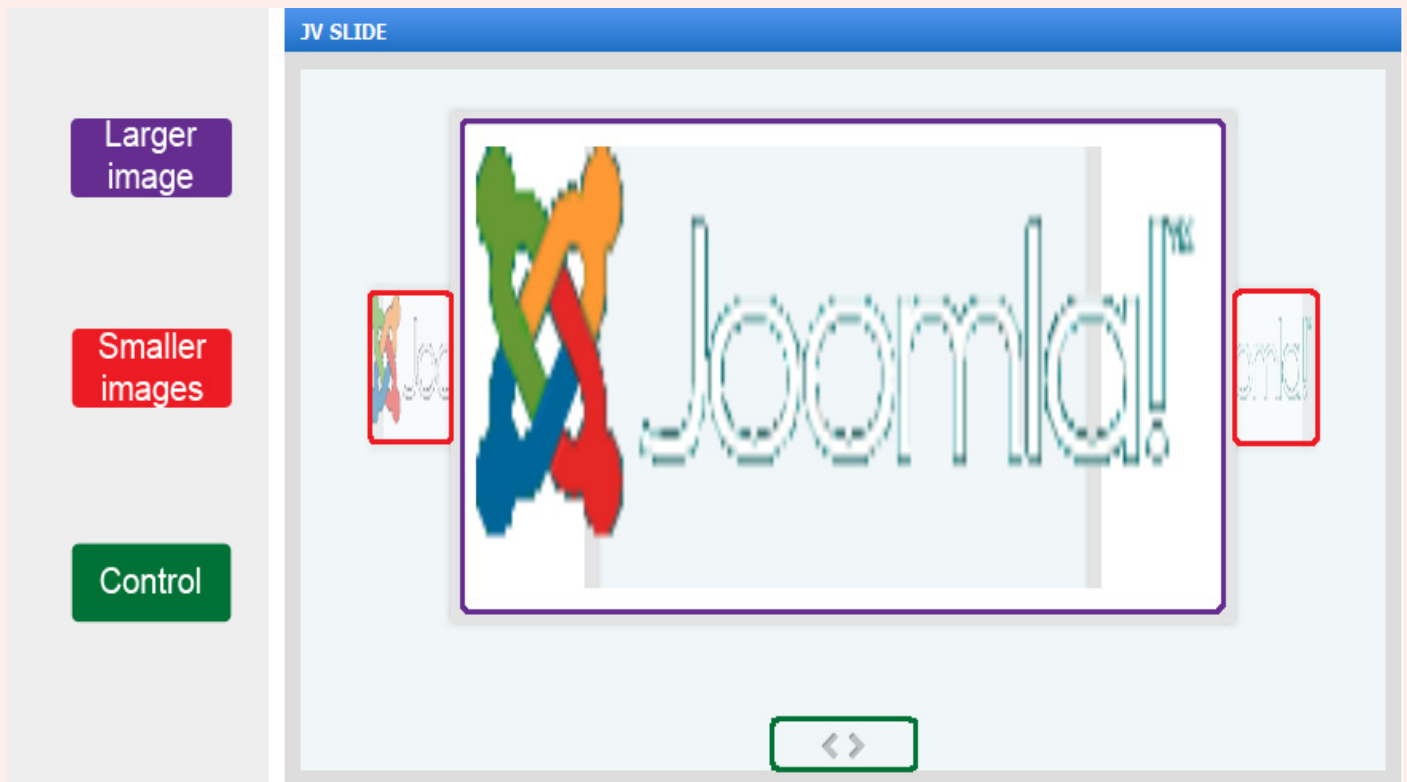

-Template: This option allows you to set the template for your slide. Currently 'default' is the only choice though.

The result

After you have finished setting the parameters/option, click on Save (Joomla! 1.5) or Save & Close (Joomla! 1.7) to save and close the Module Mod, or Apply (Joomla! 1.5) or Save (Joomla! 1.7) to save without Preview Module Mod.

To see the result of your setting, click on Preview (Joomla! 1.5) or View site (Joomla! 1.7).

If there is no problem with the parameters, the result should look like the following image:

This is the end of the “JV Slide for Joomla!” User Guide

I hope it'd be useful for those who took an interest in this Extension but had trouble figuring out how it works.

Good luck tinkering!
