JV Adventure is a Theme-Template developed by team Joomlavi for Joomla! 2.5. Featuring a visual oriented design, this template was created for sites dealing with the touring business like travelling agencies and vacation spots promoting, but can also be applied for other uses with a little tweaking.

Like other JV theme-templates, it runs on Joomlavi's theme managing extension called JV Framework, which provide several tools to make customizing it easier.

DOWNLOADING JV ADVENTURE – WHERE TO FIND IT?

To download JV Adventure, you need to register a username on <http://Joomlavi.com> and purchase a package for download privileges.

You can find JV Adventure within the 'Joomla! Templates' pages (which can be found in the 'Joomla! Products' sub-menu).

You can also go to JV Adventure's page directly using this URL: <http://www.joomlavi.com/joomla-templates/10-joomla-templates/jv-adventure.html>

Joomla! 25 : [Live Demo](#) [Download](#) [Position](#)

If you are looking for a template to use on a tourist site, or perhaps a travelling agency, please spare a moment and take a look at our Theme-Template here: JV Adventure. Developed by team Joomlavi and designed to work with the touring business, this Theme-Template features a layout that allow the user to show case his services and the place the tour will visit effectively. It can also be used for various different purposes just by changing the content displayed on the site. JV Adventure has a total of four color variations, each of them elegant and unassuming. It also run on our Theme-managing component JV Framework, which provide the user with several tools to configure his or her site easier. A little adventure sometime brings unexpected fun.

Features

- K2 style
- Support RTL
- Quickstart (Joomla! install that includes demo data)
- Mobiles: iPhone/iPad, Android, handheld theme
- Drop and drag module position.
- Validate xhtml and CSS
- 100% tableless CSS
- CSS3 powered
- Multiple Layout Options
- Google Fonts
- SEO Optimized
- 4 Colors
- Flexible template and column widths
- Custom theme profile
- Compatible: Firefox, IE 7+, Chrome, Safari, Opera ...
- Columns: Unlimited
- Typography
- Add new position, block (unlimited number of positions and blocks), edit and delete position and block...

Within JV Adventure's page, you can find a set of buttons consists of the following:
Live Demo, Download, Position.

Clicking on 'Live Demo' would redirect you to a demo-site of JV Adventure. This is also what your site will look like when using a Quick-start version of this template.

Clicking on 'Position' will open up the demo-site, with all the positions in this template visible.

Clicking on 'Download' will open the download page of JV Adventure

Latest Extensions

- JV Sport 25
- JV Digital 25
- JV Adventure
- JV Gourmet 15
- JV Gourmet 25

There will be multiple files in the download page. Before selecting which file(s) to download, please consider what you are planning to do.

-If you are setting up a new site, the Quick-Start version is the best choice, because it will install an entire new site with all associated extensions and styled to look like the template's live demo.

-If you already have a site and don't want to replace it, or you only want the template without extensions and styling, the Extension-pack/Theme version will be your choice. Installing a theme will give you only a new template/theme without any extra extension or data loss.

After you have confirm the file(s) you need, select them by ticking the box(es) in front of said file(s), then click download.

If the file you downloaded has 'unzip_first' in its name, please extract it before continuing with the installation.

INSTALLING JV ADVENTURE – HOW TO INSTALL JV ADVENTURE WITH A QUICKSTART OR THEME VERSION

Installing JV Adventure template with Quick star version:

To install a QuickStart version of JV Adventure, follow the following steps:

- Download the quick-start version of JV Adventure
- Extract the file with 'unzip_first' in its name.
- Extract the resulting file into a folder. For example, let name the folder 'Simple'.
- Copy or upload said folder onto your server's.
- Open your browser and open the URL to the folder you copied. For example, on a local host, the URL would be: http://localhost/Simple/
- Install the quickstart template the same way you install a new Joomla! instance using browser. During the installation process, you must remember to install Sample Data by clicking on the Install Sample Data button.

Joomla! 2.5.4 Installation

Steps

- 1: Language
- 2: Pre-Installation check
- 3: License
- 4: Database
- 5: FTP Configuration
- 6: Configuration
- 7: Finish

Main Configuration

Site Name

Enter the name of your Joomla! site.
Optional:
You can also enter Meta Description and Meta keywords for your site.
You may also decide if the site frontend may be immediately available or not after the installation is completed.

Basic Settings

Site Name * Adventure

Advanced Settings - Optional

Confirm the Admin email and Password.

Enter your email address. This will be the email address of the Web site Super Administrator.
Enter a new password and then confirm it in the appropriate fields.
You may change the default username **admin**. These will be the Username and password that you will use to login to the Administrator Control Panel at the end of the installation.
If you are migrating, you can ignore this section. Your current settings will be automatically migrated.

Your Email *
Admin Username * admin
Admin Password *
Confirm Admin Password *

Load sample data

Important!: It is strongly recommended that new Joomla! users install the default sample data. To do this click on the button *before* moving to the next stage.

1. Sample data: Before leaving the installation, you can populate the site database with data. There are two ways to do this:

1a. Default sample data can be inserted. To do this, make sure the Default English (GB) Sample Data is displayed in the dropdown and click the Install Sample Data button.

1b. Custom sample data can be inserted. To do this, choose an available sample data in the dropdown and click the Install Sample Data button.

2. Clean Installation: If you wish to perform a clean installation, enter the site name, admin email and choose a password. Then proceed to the final step by clicking *Next*.

Remember to install sample data to get a replication of the demo site

Sample Data set: Default English (GB) Sample Data

Install Sample Data

Installing sample data is strongly recommended for beginners. This will install sample content that is included in the Joomla! installation package.

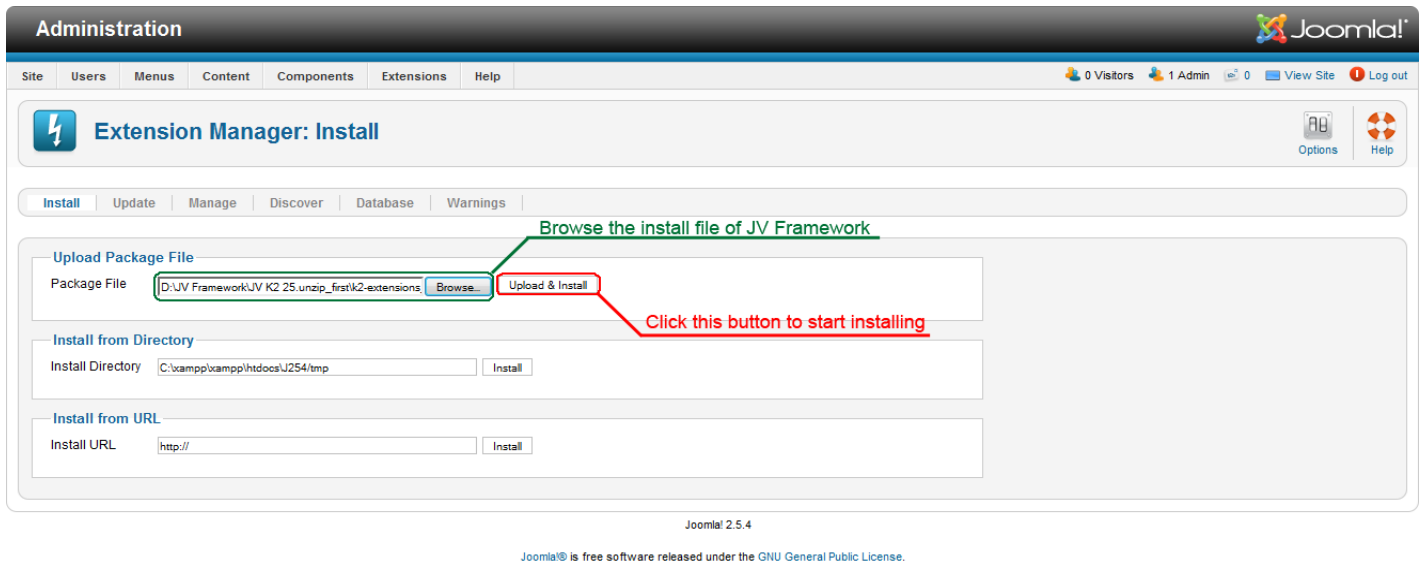

Joomla!® is free software released under the GNU General Public License.

-You can see our quick-start instruction and Joomla's installation guide for more info.

Installing JV Adventure template with Theme version:

Using the extension pack:

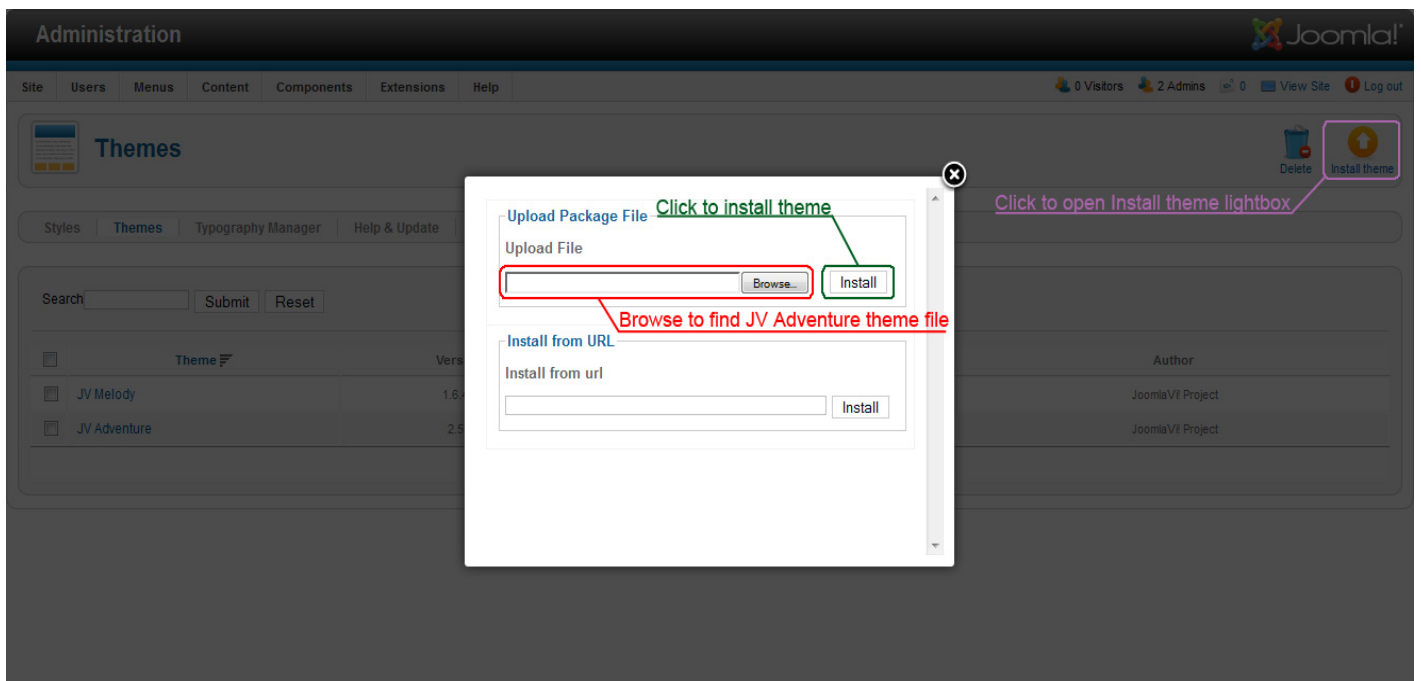

- Download the extension pack “Extensions for JV Adventure” and extract the unzip_first file.
- Log into your Joomla! back end, select extension manager (Joomla! 2.5) or Install/Uninstall (Joomla! 1.5) from extension manager menu.
- On install tab, in the ‘install from package’ section, browse the files you got from extracting the unzip_first file, select JV Framework’s ‘install file’.

- Click on ‘Upload & Install’.
- Now you can find ‘JV Framework’ from the component menu. The component will have JV Adventure theme already install. To use it, click on ‘New’ in the “style” tab and select “jv-adventure” in the “theme” drop down.

Installing JV Adventure theme using the theme file.

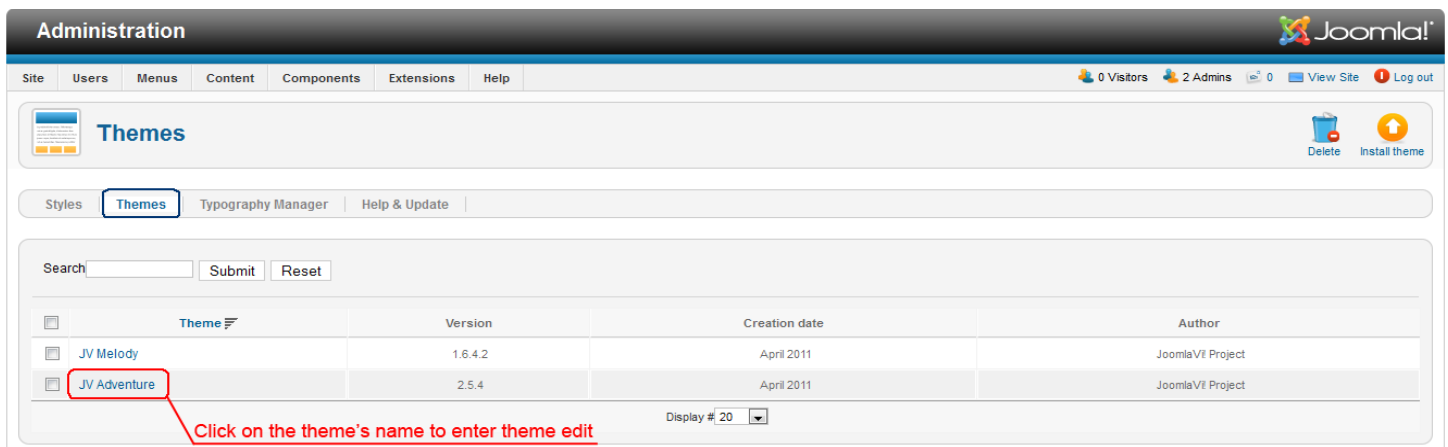

- Download the JV Framework component from: <http://www.joomlavi.com/joomla-extensions/jv-framework.html> and extract the unzip_first file.
- Install it the same way you installed JV Adventure using the extension pack download, minus the last step (create new style)
- Download JV Adventure theme from the JV Adventure download page, extract the unzip_first file.
- In the “theme” tab, click on button install theme, use browse to find JV Adventure theme file, then click install.

- Go to “style” tab and create a new style using “jv-adventure” for the “theme” drop down.

MANAGING JV ADVENTURE WITH JV FRAMEWORK – JV ADVENTURE LAYOUT

With JV Framework, you can edit the theme’s files (.css, .xml, etc) via “Edit Theme”, which can be opened by clicking on the theme’s name in “theme” tab.

Search Submit Reset

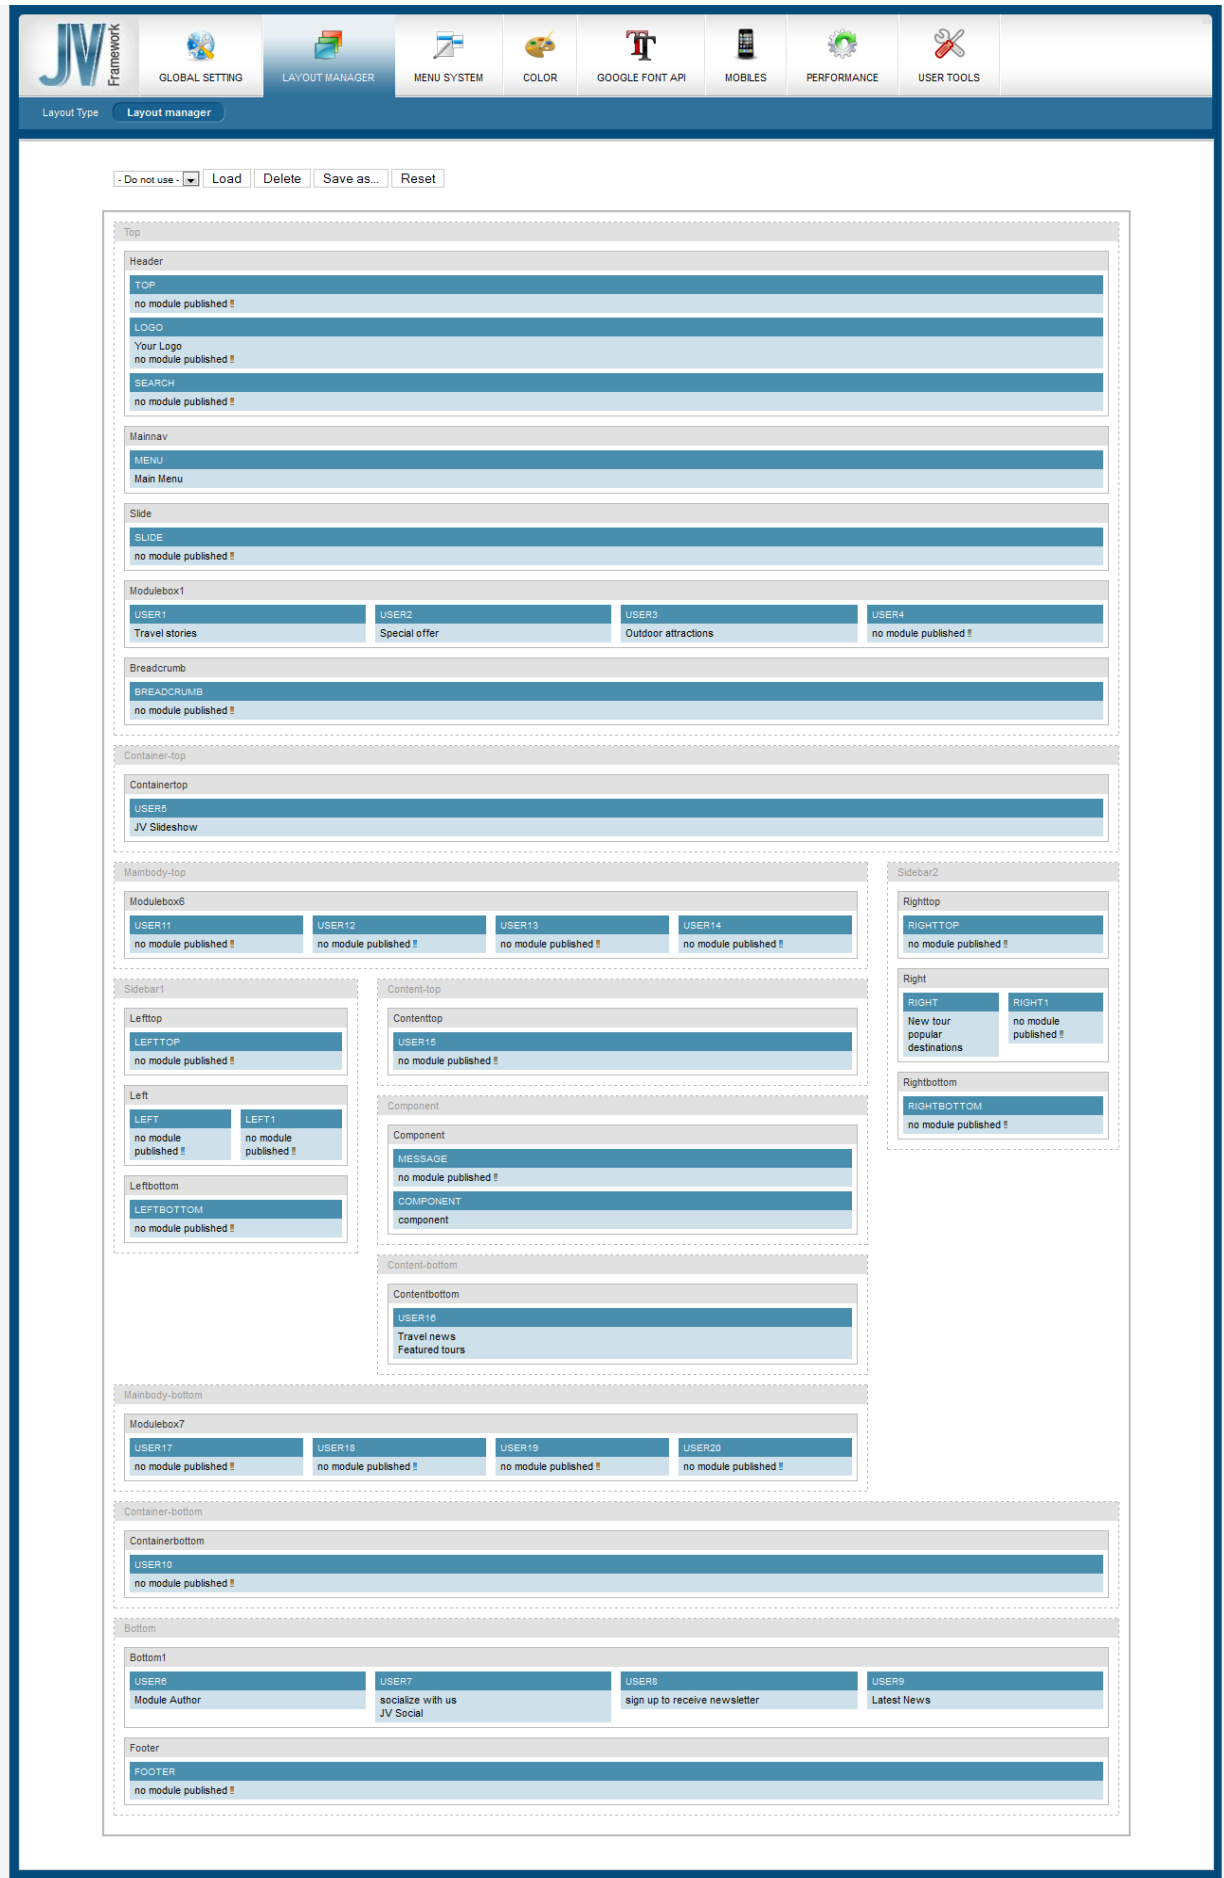

Style	Theme	Default	Assigned	ID
	jv-melody			1
 Test	jv-adventure			2

Click on the thumbnail or title to open style configuration

Display # 20

The main “style” difference between Theme-Templates is the position layout.

The following image will show the default position layout of JV Adventure:

NON-STANDARD EXTENSIONS OF JV ADVENTURE

The following are extensions that cannot be found or re-created with a default “Joomla!” installation.

If you used the Quick-start version of JV Adventure template, these will be installed along with the theme, including the styling. Otherwise, you will have to install them from our extension package or find and download them manually.

JV News

An article-displaying module that shows articles or categories in e-newspaper format

*Where to find:

- JV-Adventure Extensions pack (With styling)
- From URL: <http://www.joomlavi.com/joomla-extensions/jv-news.html> (without styling)

*Setting up JV News to make it similar to quick-start/demo:

We will only concentrate on how to set up menus and module

Create 5 or more article categories and the corresponding articles. The demo has a total of 6 categories: Travel News, Featured Tours, Travel Stories, Special Offer, Popular Destination and Uncategorized

In the back end, create 7 modules using the “JV News” Module type, name them: “popular destinations”, “latest news”, “special offers”, “travel stories”, “new tour”, “featured tours” and “travell news”

In Module config of the JV News modules, set the “Categories” parameter to:

- “Popular Destinations” in the module “popular destination”;
- “Travel News”, “Featured Tours”, “Special Offer” and “Popular Destinations” in the module “latest news”
- “Special Offer” in the module “special offer”
- “Travel Stories” in the module “travel stories”
- “Featured Tours”, “Special Offer” and “Popular Destinations” in the module “new tour”
- “Featured Tours” in the module “featured tours”
- “Travel News” in the module “travel news”

Assign the JV News modules:

- “popular destination” to the position ‘right’ on all pages.
- “latest news” to the position ‘user9’ on all pages.
- “special offer” to the position ‘user2’ on “home” page.
- “travel stories” to the position ‘user1’ on “home” page.
- “new tour” to the position ‘right’ on all pages
- “featured tours” to the position ‘user16’ on “home” page.
- “travel news” to the position ‘user16’ on “home” page.

JV Slideshow

An extension for Joomla developed by team JoomlaLavi, JV Slideshow allows the user to create a slideshow from uploaded photos or images.

*Where to find:

- JV-Adventure extensions package (styled version).
- <http://www.joomlavi.com/joomla-extensions/jv-slideshow.html> (without style)

*Setting up JV Slideshow to make your site similar to the quick-start/demo version:

-Prepare a folder where you store the images you wanted to use. If you wanted to display thumbnails for your slides, create a “thumbnails” folder within the image folder and store the resized images you want to use as thumbnails there.

-Within your site back end, go to Module Manager and create a JV Slideshow type module. You can also use the default module “JV Slideshow”

-Inside Module mod, set the location to your image folders, set your ‘source’ parameter as ‘List’. Select ‘list’ for the “Source” parameter, then set up the configuration to your liking. The demo-quickstart version default setting is:

The screenshot displays the configuration interface for the JV Slideshow module, divided into two main sections: Basic Options and Advanced Options.

Basic Options:

- Module Class Suffix: []
- Images location: images/stories/demo/slideshow/
- Source: Folder List Banner
- Images: List of image files (1.jpg, 2.jpg, 3.jpg) with a selection icon.
- Links: []
