If this is your first Joomla! site or your first web site, you have come to the right place. Joomla will help you get your website up and running quickly and easily.

Start off using your site by logging in using the administrator account you created when you installed Joomla.

Explore the articles and other resources right here on your site data to learn more about how Joomla works. (When you're done reading, you can delete or archive all of this.) You will also probably want to visit the Beginners' Areas of the [Joomla documentation](#) and [support forums](#).

You'll also want to sign up for the Joomla Security Mailing list and the Announcements mailing list. For inspiration visit the [Joomla! Site Showcase](#) to see an amazing array of ways people use Joomla to tell their stories on the web.

The basic Joomla installation will let you get a great site up and running, but when you are ready for more features the power of Joomla is in the creative ways that developers have extended it to do all kinds of things. Visit the [Joomla! Extensions Directory](#) to see thousands of extensions that can do almost anything you could want on a website. Can't find what you need? You may want to find a Joomla professional in the [Joomla! Resource Directory](#).

Want to learn more? Consider attending a [Joomla! Day](#) or other event or joining a local [Joomla! Users Group](#). Can't find one near you? Start one yourself.

 [Author's Signature](#)

[Next >](#)

JV Signature is an Extension developed by team Joomlavi for Joomla! 1.7 or newer versions. This Extension allows the user to display his or her signature at the end of his/her article.

DOWNLOADING JV SIGNATURE – WHERE TO FIND?

To find and download JV Signature, you have to register an account on Joomlavi group's site (<http://www.joomlavi.com/>).

After registering, you can find JV Signature in “Joomla! Extensions” page (which can be found by hovering your mouse over the menu item “Joomla! Productst”). Click on the extension’s name will open its download page.

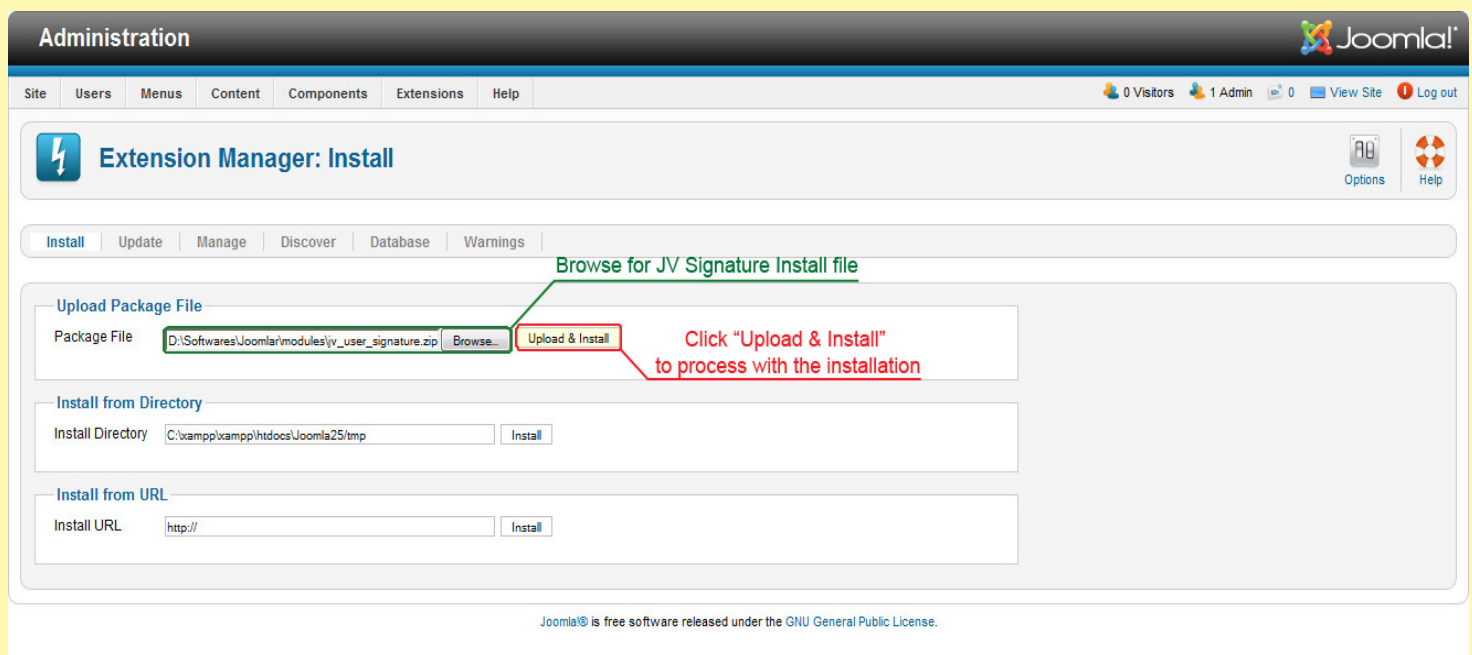

In the download page, check the box in front of the file to select it and click download.

If the downloaded file has ‘unzip_first’ in its name, please remember to extract to get the ‘install file’.

INSTALLING JV SIGNATURE

Go to Joomla! back end, open Extensions menu and select Extension Manager.

On install tab, in the ‘Upload Package File’ section, browse for the install file you extract, then click “Upload & Install” to start the installation process.

Once the installation is completed, double check in plug-in manager to see if the extension has been enabled or not.

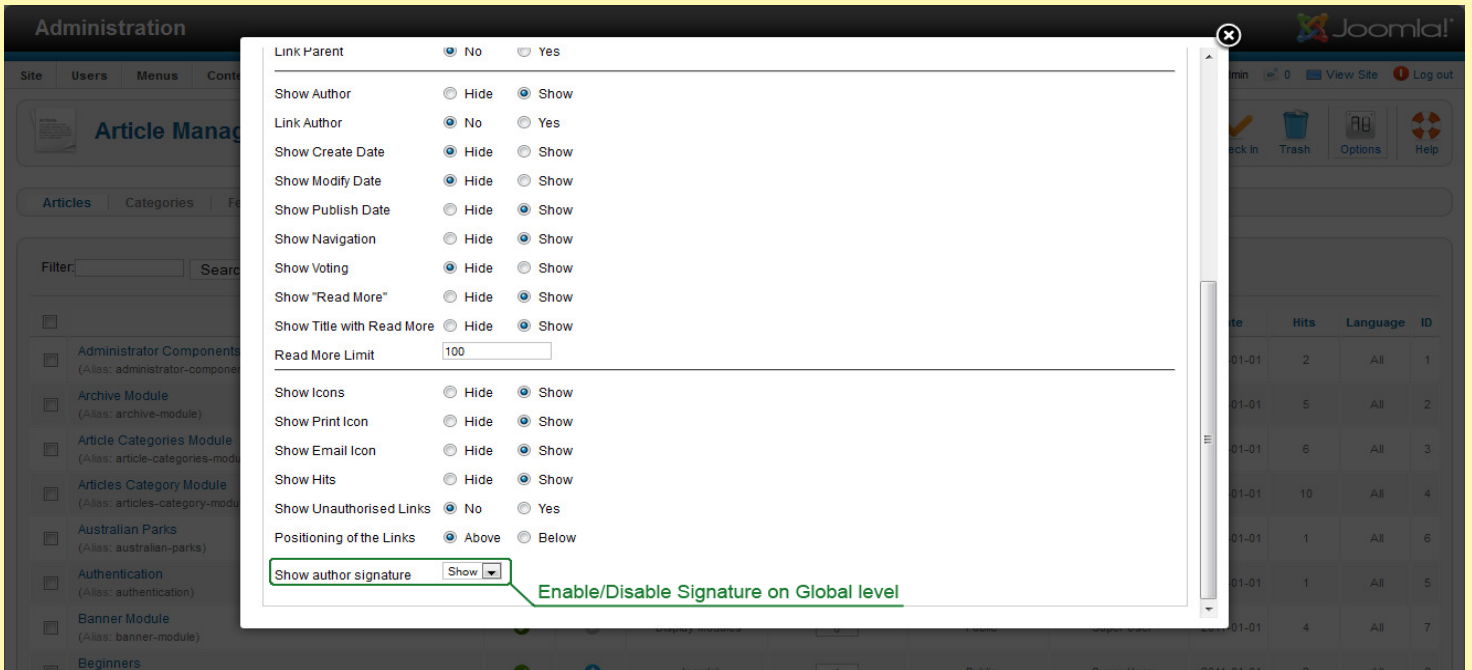

UTILIZING JV SIGNATURE

In Back-end:

The display of signature can be managed on three different levels in Back-end.

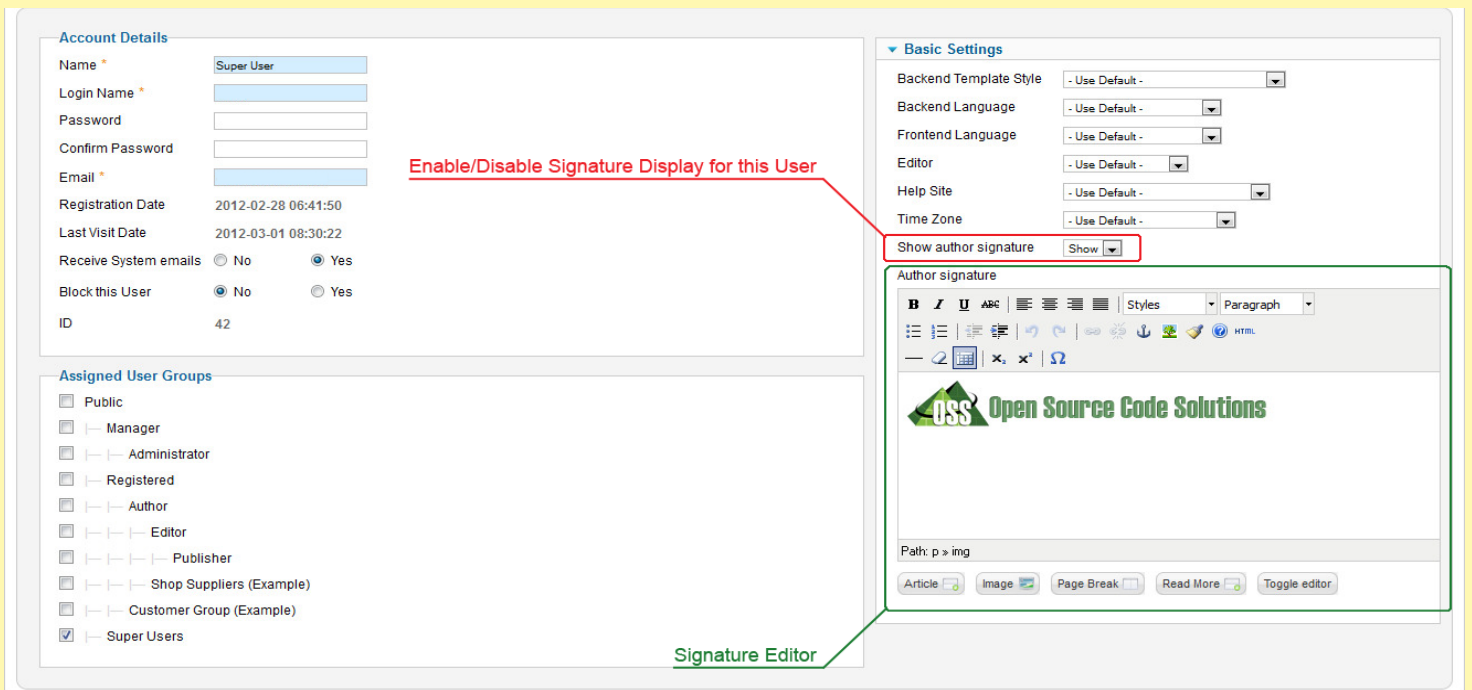

Global/Entire site:

The site's administrator staff can choose to enable or disable signature display for the entire site. To do so, simply go to Article Manager (inside Content Menu), open the Options popup and edit the parameter "Show author signature" found in Article Tab.

User level:

This level allow the creation and changing of a user's signature, as well as enable/disable signature display on all articles created by said user. To configure these properties, open User Manager (inside Users Menu), search for the user in question using the search tool, open the user's Edit Profile page, then configure the "Show author signature" and "Author signature" parameters.

Article level:

Signature display can be enable/disable for individual article in the edit Article Page.

The screenshot shows the Joomla! 'Edit Article' interface. On the left, there are fields for Title (Beginners), Alias (beginners), Category (Joomla!), Status (Published), Access (Public), Permissions (Set Permissions), Featured (Yes), Language (All), and ID (8). The main area contains a rich text editor with a toolbar and a text area containing introductory text about Joomla! documentation and support forums. On the right, the 'Publishing Options' section is expanded to show 'Article Options'. A list of options is displayed, each with a 'Use Global' dropdown menu. The 'Show author signature' option at the bottom of this list is highlighted with a red box. A red arrow points from the text 'Enable/Disable Signature Display for this Article' to this option.

In Front-end:

In Front-end, a user can create/edit his signature and enable/disable signature display for all articles created by said user.

To access these function, the user need to:

Login using his account

Open “Your Profile” from User Menu

Open “Edit Profile”

Edit the “Show author signature” and “Author signature” parameters.

This is the end of the Joomla! Extension: JV Signature User Guide

I hope it'd be useful for those who took an interest in this extension but had trouble figuring out how it works.
